ARKANSAS SEED & NURSERY CO. FAYETTEVILLE ARK.

Shoemaker Jan 1: 1925

HAT you are missing the opportunity of your life if you have never enjoyed the good feeling—the exhilaration—of knowing that when you do your planting you have done everything possible to assure a good crop.

When you have worked hard to put the soil in shape

and have bought the best seeds and trees to plant and planted them carefully, you have done everything that

human power can do.

planted them carefully, you have done everything that human power can do.

Here we are again around to a new planting season!

Just a few nice sunny days, with the birds singing merrily in the tree tops and every one will be filled with that desire to get out and dig in the garden, scratch in the fresh, crumbly soil and plant something—seeds, trees, shrubs, flowers.

About this time of year I always get that tickling, itching, dirt-digging feeling that always comes at spring time. Words can't describe what the feeling is, where it is or where it comes from. But it comes, just the same! When I was a boy, my father told me it was the spring fever.

But, whatever it is, everyone who loves plants, and likes to see things grow, knows just what I mean.

And what a satisfaction it is, when you do plant seeds, trees, or what not, to know when you are planting them, that they are going to produce.

You want to know that all the time, labor and money that you put into the preparation of your garden, field or orchard is sure to produce the biggest possible profit for you. That's only good judgment.

But no matter how much work and time you put on the preparation of your ground, unless you have good seeds and trees, your time, labor and money is all wasted—thrown away!

Many, many times I have seen great fields planted, where the returns did not pay for the labor of planting—because the seeds were no good to start with. I have seen orchards turn off most disappointing crops, just because "cheap" tree had been planted.

Poorly rooted, poorly grown trees are not worth planting. It takes just as much time to plant a poorly rotoed, crooked, stunted, "cheap" tree as it does one that is absolutely first class all the way through. It takes just as much time, work and worry to bring a cheap tree into bearing as it does a good one. And what a difference in the results when the bearing time comes around!

Good trees can be sold at a low price.

And that is just what I am doing—selling good trees for little money! I was raised on my

Arkansas, and out over the broad, dusty plains of Oklahoma.

I walked from farm to farm!

I have walked clear across the state of Oklahoma and back again, peddling trees. I got a good insight into the nursery and seed business in that way, and learned to love the business.

Later, as I grew into young manhood, left my father's farm and started a little nursery of my own. But I had learned

You positively take no risk when you buy your trees from

I started into business giving my customers a square deal, and I still stick to it. "Satisfaction guaranteed, or your money back" has always been my policy.

money back has always been my policy. I can safely make this guarantee, because I grow all of the trees and plants that I sell. I grow them right here in the "Heart of the Ozarks" of northwestern Arkansas, where I have the finest tree-producing soil that the sun shines on. There is no better soil for the growth of nursery stock anywhere in the world. I do not say that boastingly. It is a fact. And that fact, together with my fair and square, iron clad guarantee, takes all the guess out of buying for you. You are the judge. You must be satisfied with your purchase from me.

Guarantee to You

how the cost of selling trees affected the price the consumer had to pay. When I started into business on my own account, I decided to give my customers the fullest possible benefit in the way of prices, by growing my trees in such quantity that good trees could be sold for a very modest price and still leave a little profit for me.

And during the years that I have had my own nursery, it has been my effort and desire always to produce just the very best possible trees, plants and seeds that it is humanly possible to grow, and to sell them for the lowest price within reason.

That this idea has produced results is evidenced by the steady growth of my nursery until it now covers a thousand acres, and my satisfied customers number thousands and thousands, in every state of the United States, and even in many foreign countries.

As you look through this catalog you will see reproduced, just a very few of the thousands of letters I have received from satisfied customers. They are proof that I give my customers a square deal—that I do just as I say.

Look through this catalog carefully. Be sure to read my Big Bargain offers if you are really looking for some extra big values for your money.

I assure you that I want your order. I will personally do my level best to see that your order is filled with extra care. And every one of my big and loyal staff of ambitious workers will do likewise.

Just run through this catalog. Look at my prices. Compare them with others if you like. And remember my guarante—

"Satisfaction or Your Money Back." You are the judge.

## Read What These Folks Say

My sample order sent to you has just been received, and I want to thank you for the nice trees you sent. They got here in exceptionally good shape and are equal to trees we have ordered from a nursery in this state at a cost of from 50 to 75 cents each.—J. L. K., Texas.

I got my trees and planted them out in just 5 days from the time I mailed my order to you. They were in fine shape and I like mine. Trees like you sent me cost 50e each and better here.—F. B., Oklahoma.

I received my trees in good shape and think they are fine for the money.—Mrs. A. T., Oklahoma.

My order received yesterday and will say I was much surprised at the trees received. They are far above my expectation.—
B. B. K., Missouri.

The trees arrived in fine shape. Am very well pleased with their looks. I will recommend your nursery to anyone wanting first-class stuff.—M. B., Oklahoma.

Some time ago I ordered some peach and apple trees. I sure am well pleased with them.—R. T. L., Mississippi.

Yesterday I received the trees which I ordered from you but five days before. Gentlemen, I wish to thank you for the nice trees you sent me, and also for the promptness in getting out this order. All who saw the trees were surprised at the quality and price. A number of persons asked me to write and find out if you would send out a like number of trees of the same quality for the same money.—J. A. B., Kansas.

## **Every Tree Guaranteed**

We stand behind every tree we send out. If you are not entirely satisfied,—if you are not entirely pleased —if you do not think that we are giving you the biggest value in trees that you ever got for your money—just send them back, and we will refund your money. Send for these peach trees. Plant them this spring. Have a dandy peach orchard of your own. Enjoy the satisfaction of having all the peaches you want all summer long right off your own trees. We will send you an assortment that will give you a succession of high quality fruit from early till late. till late.

Free Gift from us. This vine produces large black grapes of excellent quality. It ripens very early. Delicious fruit to eat and makes the finest of jelly, marmalade and juice. Our supply is limited, and cannot last long, because of the extremely low price we are making on this offer. To be sure of getting yours, you should send your order immediately—RIGHT NOW—and get the FREE grape vine with your trees.

Offer No. 1012

the "Heart of

to have. School boys and girls used to have an apple in their lunch basket when they went to school. And they should have now. Plenty of apples to eat give the youngsters their rosy cheeks, their good health and active minds.

I'm a strong believer in an orchard for every home. I am convinced that at least one apple tree should be in every door yard. And I know as a positive fact, that as a money maker, as a big profit business, there is nothing that will beat a good big commercial apple orchard.

Putting your money into an apple orchard is just like putting it into a Savings Bank. But it makes money faster. No investment in any branch of farming makes money more certainly or more rapidly than that of growing apples for market. It is just like having a mint of your own.

I can point to hundreds of apple orchards of our trees, where the owners started in business with just a little land and a few dollars. Today they are living in big, comfortable, up-to-date homes, with ine automobiles to ride in, and money in the bank. Apples did it!

To my notion, apples are the greatest fruit in the world. There is nothing better. They are easy to grow. There is a hungry market ready and waiting. Everybody likes them. They can be used in more ways than any other one kind of fruit. In fact, I venture to say, apples can be used for a greater variety of purposes than can all other kinds of fruit put together!

a greater variety of purposes than can all other and of the together!
And how genuinely good they always are! What can beat that sweet smell that comes from a basket of rosy cheeked apples? Where in the world is there a sweeter fragrance than that of the apple cellar? What tastes better than a big red apple, so crisp that the juice fairly flies when you bit into it? And what pleasure of childhood can compare to that of digging away the frozen dirt of the apple pit, pulling off the straw and then drawing out big, juicy apples, cold, fragrant, delicious and healthful? If you have passed along in life without that pleasure, you have really missed one of the pleasures of being alive.

But you need not wait much longer. You can begin getting ready for

of being airve.

But you need not wait much longer. You can begin getting ready for it right now. An apple tree, or a whole orchard of them planted this spring will soon be in bearing. And if you will plant a real, manize orchard, it will make more money for you throughout the rest of your life than any other crop you can plant.

There is no need to envy the man who rides past your home or farm in a high powered car. You can have one of your own. You children, too, can go to college. Apples will make the money.

You can have a modern home, with all sorts of labor saving devices to cut out the dradgery of taking care of a big house. Apples will make this possible.

make this possible.

And it won't cost you a fortune to plant these trees. We grow them and sell them to you direct. No middlemen's profits for you to pay. No extra charges. A guarantee with each tree.

The names throughout this Catalog conform to "Standardized Plant Names"

we now have better varieties than we used Offer No. 1011

as easy to grow as they ever were. And

## A Home Apple Orchard

"An apple a day keeps the doctor away." Here are apples for the whole year 'round. The very finest varieties for every home use—eating, cooking, and storing in the cellar for winter. Genuine goodness in every kind. In this assortment, we have taken care to pick varieties adapted to a wide range of soils and climates, and varieties that need no introduction. Every one of these is a well known, time tried and tested sort, and popular with everyone. If you want a really fine assortment of choice varieties, and just enough for a nice

If you want a really fine assortment of choice varieties, and just enough for a nice orchard in your back yard, here are the trees. Each tree is of guaranteed "Heart of the Ozarks" quality, straight, clean, healthy, one year old. As a pace setter in value, this offer simply cannot be beat. You will be greatly pleased with these trees. They will make that orchard of your dreams, and at such a small cost, too. Order them now.

now.

Extra Large 1 Year Old Apple Trees

5 Trees each of Yellow Transparent, Jonathan, Delicious, Arkansas and Stayman Winesap.

Offer No. 1001

## Two-Year Old Sturdy Apple Trees

#### Three Standard Varieties of Our **Transportation** Selection Charges Collect

This is one of the biggest values in apple trees that I have ever been able to offer to commercial orchard buyers. It is made possible by the great quantity of extra fine two-year-old trees that I have this season. Every tree is a specimen—big, clean, healthy, well branched, 5 to 7 feet tall—just as fine as fine can be. I have never grown finer trees than these in the many years I have been in the nursery busi-

GENUINE WHOLE ROOT GRAFTS
The "business end" of the tree is
its roots. We use nothing but the
first grade, whole roots. Every
tree has a perfectly made "tongue"
cut right at the crown, to which
the scion of the same caliper is
carefully fitted. The whole then is
smoothly wrapped and a perfect
union results. Such trees are the
only kind worth planting.

ness. I may never be able to equal them again soon, as it may be a long time before we have so good climatic conditions. And never again will it be possible to offer such a large value—300 two-year-old apple trees of three standard varieties of my selection, for only \$100.00.

**ENOUGH TREES TO PLANT 10 ACRES** 

This makes an orchard of just the right size to make big money for you. And in filling your order, I will select varieties that are adapted to your locality. But in this low priced offer, I reserve the right to select the kinds, and in making this selec-

reserve the right to select the kinds, and in making this selection I will be aided by some of my skilled assistants.

The trees will be sent to you well packed and in fine condition for planting, by freight or express, which ever you prefer, and with transportation charges collect. In ordering, please indicate whether you want the trees sent by express or freight. If you intend planting a commercial apple orchard within the next year or two, I urge that you buy these trees, as you will not soon have the opportunity of getting such fine trees as I will send to you in this offer for so little money. I could not afford to make such a liberal offer as this under ordinary conditions. But I have a large over-supply of fine two-year-old apple trees and I would much prefer to dispose of them at a very low price than to burn them at the end of the season. Not More Than Two Lots of These Trees Sold to Any One Customer

## WHY YOU SHOULD CHOOSE "Heart of the Ozarks" Trees

FIRST-They are grown in the best root producing soil in the country. Good roots are of first importance in the value of a tree.

SECOND-The high altitude of the "Heart of the Ozarks" gives our stock the hardiness of trees grown in the far North. Our Southern latitude gives us all the advantages of a long growing season-sturdiness, vigor, health.

THIRD—The favorable climate produces trees of the utmost vitality—trees that are bound to grow and thrive.

FOURTH-We grow trees by the millions. That gives us a low production cost and permits us picking out the very best for our customers. FIFTH—Every tree is guaranteed. money back if you are not satisfied.

places.

24. ARKANSAS (Mammeth Black Twig)
There is more real goodness wrapped up in
the skin of this excellent apple than most
folks realize. The fruit is big in size. It
is beautifully colored with a dark, rich red
cheek—although often red all over. As a
late keeper in cellar or cold storage it is
one of the best. Commercial growers like
this apple because it fills the barrels quickly.
The trees are healthy, strong branched and
able to hold up the big crops they produce.
It is closely related to the old Winesap,
and, in flavor, has much of the snappiness
of that good old apple. That is one reason
why it always sells at good prices. In our
territory this apple is better known under
the name "Mammoth Black Twig" than as
Arkansas. But Standardized Plant Names
gives Arkansas the preference.
13. ARKANSAS BLACK—Easily confused
with the preceding in name only. This
apple is so red it is almost black in color.
The flesh is of a distinct yellow color; very
firm, juicy and fine flavor. It is best to
eat in late winter or early the next spring
after ripening. This apple is much liked
as a commercial fruit.
16. COLLINS (Champion)—This apple
originated here at Fayetteville, Ark., and
therefore is a real "Heart of the Ozarks" I
apple in more ways than one. The fruit is
of large size and solid red in color. In
shape it is somewhat flat. The flavor is
fine, either when eaten out of the hand er
when cooked. It is a good variety for home
use, and is much liked by the commercial y

grower, because of the heavy, regular crops.

17. DELICIOUS—Words are simply too weak to express the beauty, the fragrance, the inexpressible flavor of this grand apple. Without a doubt it is the finest apple in every way that is grown. There is no other apple like it in appearance, in flavor or productiveness.

like it in appearance, in flavor or productiveness. In size it is large to very large. The skin is heavily splashed and streaked with a brilliant red, sprinkled with tiny pin dots of light yellow. The flesh is creamy white, and of a flavor that causes everyone to immediately exclaim its name—Delicious! As an apple for the home, this variety should be in every door-yard. As a commercial variety, there are none that bring more money for the grower, year in and year out. It is the one, outstanding gem among apples, and the one you should, by all means, include in your apple tree order.

18.—GANO—Large, solid red apples with white flesh. Its close relationship with Ben Davis is very evident in every way except in having a higher color.

having a higher color.

19. GRIMES GOLDEN-

19. GRIMES GOLDEN—There is a wonderfully pleasing flavor in this apple, and it
is much liked for eating. It makes the finest pies, sauces and salads. The fruit is
of a yellowish green color, becoming bright
yellow when fully mature. One of the best
varieties for the commercial grower.

20. INGRAM—This apple looks much lite
the old-time Geneton except of larger size
and better colored. Blooms very late and
frequently has a crop when other kinds are
killed. Originated in the Missouri Ozarks.

21. JONATHAN—The best of all solid red
apples for any purpose. It is a universal
favorite. Bears well; keeps well in storage;
always fine for use from
early fall.

22. KiNG DAVID—
This is another good

This is another good apple that originated in the "Heart of the Ozarks," having been in the 'Heart of the Ozarks,' having been found growing in a fence corner on a Washington County, Arkansas, farm. It is evidently a cross between Arkansas Black and Jonathan. cross between Arkansas Black and Jonathan, having the rich, dark red coloring of the former and the snappy juiciness of the latter. The fruit hangs on the tree well until it becomes highly colored, in which form it has a most appealing appearance. As a commercial.

most appealing appearance. As a commercial variety, this is one of the good ones.

23. LIMBERTWIG—A deep red, medium sized apple having late keeping qualities. Much liked in the Southwest. Trees of rather spreading habit; productive.

25. MeINTOSH—Skin solid, dark red;

ARKANSAS BEAUTY APPLE

(See Front Cover Page)

(See Front Cover Page)

This fine apple is a brand new variety in many laces. It originated here in northwestern Arkansas about 30 years ago, and has been grown locally in a small way. It is a real gem and deserves extensive planting. In color it is solid red, closely resembling Jonathan. It ripens several days earlier than that variety, right at a time when the market is hungry for a high class eating apple. Arkansas Beauty is of very fine flavor, and one of the best eating apples we know of. In flavor and appearance it is an improvement on Jonathan. And in tree characters, it does not blight

characters, it does not blight as Jonathan does; bears heavily and regularly. Try a few Arkansas Beauty Trees this

Price, Strong 2-Year Trees

75¢

year.

winesap family, this is the largest in size, handsomest in appearance and heaviest bearer. Its quality begins in the tree—sturdy, strong, well shaped and able to hold up the tremendous crops it will produce. The fruit is of large size, simply huge on young trees; brillian, showy red in color and with a flavor possessing all of the goodness, juciness, crispness and tang of the old Winesap. Stayman Winesap is a highly satisfactory apple for every purpose. It is excellent for home use, and a money maker for the commercial grower and an apple that is sought for by consumers at the markets of the country.

27. WINESAP—Everybody who knows apples knows this good old apple. In quality, it is one that is used as the standard by which others are judged. The fruit is of medium to large size and solid red color. Its name is suggestive of the excellent, spicy goodness of its flavor and juiciness, and few apples are in any better demand on the market. Winesap is an excellent variety for the home orchard, and an indispensable sort for the commercial grower.

28. WHITE PEARMAIN (White Winter Pearmain—Not particularly attractive in size, shape, quality or appearance, but holds its own as a home and market favorite. Fruit greenish-yellow, blushed with red; mild flavor; yields well and keeps very well.

29. YORK IMPERIAL—Fruit of large size, conspicuous because of its unusual pinkish-red color and odd shapes the fruit sometimes have. A splendid variety to grow for market; excellent for baking. As a cropper York Imperial is one of the best yielders throughout the Middle West and Eastern apple districts. The fruit runs well to large sizes so that it fills the barrels rapidly. It is a good keeper in storage, and sealer red in the production of the post productions have a good keeper in storage, and sealer apple districts. The fruit runs

## **Grow Some More** Summer Apples

Here are Extra Fine Varieties, with Genuine "Heart of the Ozarks" (quality.

1. EARLY HARVEST—One of the most popular early apples. Yellow, tender, fine in flavor; comes into bearing young.

3. L O W L A N D RASPBERRY—Large fruits, creamy-white skin streaked with brilliant crimson. Excellent flavor. Tree bears young and heavily. Fine apple for home or market.

4. MAIDEN BLUSH—This variety is a gem. The fruit is big, with a clear yellow color, and a brilliant red cheek on the sunny side. It is about to look at, and with just the right snappy juiciness to make it an extra fine eating apple. For cooking, it makes a most delictous sauce and pies that are simply wonderful. It is about the latest of the summer apples to ripen, and if put in a cold cellar, or in cold storage, can be held for months. The tree is a good grower and bears well. This is a mighty fine variety for home use, and is a money maker for the commercial grower.

5. RED JUNE—Fruit of medium or small size, solid red; flesh white tinged with red. Much liked in early summer for sauce. Trees bear well.

5A. RED ASTRACHAN—One of the most popular of the large, red summer cooking apples. Fine market variety everywhere, and one of the best for home use.

6. SWEET BOUGH—Fruit of large size; yellow, heavily streaked with red. Snappy, agreeable fiavor. Tree yields well.

8. YELLOW TRANSPARENT—Of the solid yellow, early summer apples, there is no variety any better than this. The fruit is of medium size; whitish-yellow fruit the bill of the propulation of the best apples for home use, because it comes so early and as and a so no so fine to eat or fruit of the size; whitish-yellow fruit of the size; whitish-y for home use, because it comes so early and is so fine to eat or eook. And as a mar-ket apple, it brings top prices.

We are just as anxious to give you big value as you are to receive it.

## Fall Apples

Fall Apples

9. OLDENBURG (Duchess of Oldenburg)
—This is the most popular and best liked of the late summer apples for cooking. It is an old time, well known favorite. The fruit is of large size, beautifully colored; fine, acid flavor. Tree of medium size, and liked as a filler.

10. MAMMOTH PIPPIN—An apple of the Rhode Island Greening type, similar in appearance and quality.

11.—ROME BEAUTY—The big, large, round, red striped fruits of this fine apple are luscious for eating, extra fine for baking and other cooking purposes. The strong demand for the fruits of this apple, together with the heavy production of the trees and its adaptation to a wide territory, make it one of the best commercial apples. A popular and profitable sort to grow, for either home or market.

12. WEALTHY—The beautiful, red striped fruit of this apple is well known on all of the big markets of the country. Excellent in flavor. The trees come into bearing early and are about as sure croppers everywher as any of the fall varieties. It is an apple that is a continual delight. Growers like it because it is an excellent cropper, packs well, looks good and sells for good prices. Fruit dealers like it because it is one of the most attractive apples of its season, and the market never drags on Wealthles. Consumers like this apple because of its excellent flavor for eating out of the hand, because of the excellent pies it makes and because of the excellent pies it makes and they come into bearing early, often producing a bushel to a tree when five years old.

We are just as anxious to give

30. WHITNEY—One of the largest and handsomest Crabs. Flesh firm, julcy and rich. A great bearer and extra hardy. Tree a vigorous and beautiful grower. Excellent for cider and cooking. Season early. 30A. TRANSCENDENT—Tree immensely productive, bearing after the second year. Excellent for sauce or pies, either green or dried, and unsurpassed for cider. Flesh yellow and crisp, with an agreeable flavor. Season medium.

31. HYSLOP—A handsome Crab of excellent quality and unsurpassed for general 31. HYSLOP—A handsome Crab of excel-lent quality and unsurpassed for general purposes. Flesh yellow, with a sub-acid, pleasant flavor. Tree highly ornamental.

Crab Apples

Season late.

32.—SIBERIAN—Vigorous grower. Highly flavored and juicy. One of the best.

LIKES OUR TREES

I received the 6 apple trees and they all were in fine shape. They sure did have fine roots. The order I got from you early in the fall they are all a looking fine. The climate is so much warmer here the trees sure are a doing fine. I like your trees better than any other nursery I have ordered from. The way you pack the trees they have always reached me in good shape. Thank you very much for your apple trees. I think they will do well. We are a having a fine season in the ground for the trees this year.

I think they will the ground for the trees this year. Please send to my neighbor, whose name is enclosed, one of your catalogs early this fall. He is a talking about putting out an orchard this fall. I have showed him the trees I got and he is well pleased with them. He likes the way you pack them. He likes the trees because they have got such fine roots.—J. W. LABSTEIN, Texas.

EVERY TREE LIVED

I am writing you concerning my trees I ordered from you in 1922. I was well pleased with them and they are thriving well and every one of them lived. Please send the trees I am ordering at present by return mail with information how te plant.—B. C. NORRIS, South Carolina.

OUR PRUNING APPRECIATED

I will take the pleasure in writing to tell
you how well pleased I am with the trees.
General directions for planting and the
trees pruned ready for planting, was very
much appreciated. Will you please give me
information for taking care of trees during
cold weather.—A. F. SHELTON, Texas.

If you have only a small amount of ground that you can plant to fruit, and are uncertain as to just what to get, just order this collection. Our expert horticulturists will select the varieties for you, varieties that are sure to do well in your locality, and varieties that will provide the largest supply of choicest fruits for home use. Every tree and plant will be of our very best grade—well branched, strong 2-year-old apple trees, big husky peach trees, vigorous grape vines and the best of blackberry plants. You we be proud of these plants, and will show them to your same plants. That is just 5 Grape Vines what we want you to do and one of the big reasons 5 Peach Trees for making the amazingly low price on this grand collection. Remember, our iron clad guarantee goes with this collection. Jenathan

Ozark Grown Fruit Trees

The very thoughts of a big, dead ripe, juicy peach, cut up and spread with plenty of cream and sugar makes one ravenous for it. It is a dish fit for a king, and yet a dish that can be enjoyed in the humblest home.

Peaches are never so good as when you pick them yourself right off your own tree, and so ripe the juice fairly bursts through the skin as the fruit is held in the hand. Peaches were made to eat! And

held in the hand. Peaches were made to eat! And such luscious fruits as they are.

Next to apples, more folks can grow peaches with satisfaction than any other fruit. And the fruit can be used in such a variety of ways in the home. What pleasure it is to have the pantry shelves loaded with canned peaches, preserved peaches, peach pickles, marmalade, conserve, and peach jelly! Nowhere can more delicious good things like these be found than in the home abundantly supplied with peaches of their own growing. And there are few places in the

country where peaches cannot be grown.

And as a money maker for the commercial grower, fabulous fortunes have been made in a very few years by peach growers. Many instances are on record where peaches have proved to be a veritable "get rich quick" crop. But we do not encourage our customers to rush into the planting of peaches with the certain feeling they will reap enormous profits in short order. Commercial peach growing has its hazards. It is immensely profitable under the right conditions of soil and climate, and in the hands of one who "knows the game," or who is willing, through hard work, study and patience to fit himself for the business.

For years we have made a specialty of growing peach trees for home and commercial orchard planting. Next to apple trees, they are our most important line. We grow them as "June buds," for the commercial orchard planting. Next to apple trees, they are our most important line. We grow them as "June buds," for the commercial orchard planters of the South; and as one-year-olds and two-year-olds for the home orchard planter and the Northern markets. We grow these trees by the millions and cell them by mail, thereby giving you the greatest value for your money. "Every tree with a guarantee."

# ARKANSAS SEED

## **Early Peaches**

Early Peaches

33. MAYFLOWER—This is the earliest peach to ripen. The fruit is medium size, creamy white, blushed with red on the sunny side. Clingstone. The chief merit is earliness, and that is why this variety is liked among commercial growers.

34. EARLY WHEELER (Red Bird)—The earliness of this beautiful peach, together with its fine flavor, make it one of the most sought after of the very early ripening kinds. The fruit is creamy white, overspread with bright glowing red, making a fruit of exquisite beauty. The flesh is firm and meaty, yet very juicy, and of a genuinely good flavor. It is a splendid variety for the home orchard, as it ripens almost before the berries are gone.

35. ARP (Arp Beauty)—The earliest good yellow cling. The fruit is of beautiful appearance, splendid in flavor and an excellent sort for the market grower.

36. CARMAN—Among the white fleshed, freestone peaches, few are more delicious than this kind. The skin is brilliantly splashed with red on a creamy white background; and in taste, its appearance is not a bit deceiving. It tastes just as good as it looks, and is especially good when canned in a thick syrup. This is a very good variety for the home orchard and a money maker for the market grower.

37. EARLY CRAWFORD—If this peach was more certain in its productiveness it would be the leading early yellow freestone. It deserves a place in the home orchard because of its fine quality.

38. GREENSBORO—One of the best early white-fleshed, semi-cling for regularity of crops. Quality fair, but a good commercial variety.

## Splendid Mid-Season Peaches

Season Peaches

40. Belle (Belle of Georgia)—A beautiful, large, creamy white peach with a bright red cheek, and exquisite flavor. Semi-freestone. A dandy for the home orchard, and a favorite among commercial growers of the South. Deserves to be more largely used for home and market growing.

41. CHAMPION—Did you ever go out into your orchard on a bright, sunny day in July or August, and pick several big. The peaches of the most superbed by the most of the most with thick cream and plenty of sugar, and then eat them? If you never have, you have missed completely one of the most superb dishes ever prepared. Peaches are always best picked fresh from your own trees when fully ripe, and Champion is no exception. It is good anytime after it has become well colored. But for the supreme essence of real flavor, let Champion get fully ripe and then eat it! One peach won't beneatly enough. You will only regret that you can't accommodate the entire crop. Champion is a grand peach in flavor. It is a beauty in appearance. It is a very good cropper, even in years when other kinds run light. It is a superb variety for the home, and should be planted wherever peaches will thrive. It is a splendid variety for growing in a large way for the local market, but a little too tender for shipping. For home canning there is no peach that carries its flavor so well.

42. EARLY ELBERTA—The ripening period of this peach is 10 days or two weeks ahead of Elberta. The quality of the fruit is better than of the later variety, but otherwise it is almost identical. Commercial growers find it valuable in lengthening the Elberta season.

46. ELBERTA—One of the great

imost identical. Commercial growers valuable in lengthening the Elberta season.

46. ELBERTA—One of the great peaches of the earth. (Freestone.) Ripens here early in September, following closely up on Farly Crawford. A beautiful, extra large, golden yellow peach, with a brilliant red cheek, firm, juicy, high flavored, rich and sweet. This is the best commercial variety. For years it has been the standard market variety, and its place in the estimation of commercial growers would be hard to fill with any other variety, for no other peach has yet been introduced that will fill all requirements of a commercial peach with such success as the Elberta. In addition to its high quality, large size and attractive appearance, the Elberta has a tough skin and consequently does not bruise easily and ships exceedingly well. Elberta remains the peer of all commercial peaches, and from present indications will hold this place undisputed.

47. FITZGERALD—An improved Early Crawford, being fully equal to it in size, quality and color. The fruit is large; brilliantly colored yellow skin splashed with red. Flesh is deep yellow. The fruit is of very large size, exceeding that of Early Crawford. In quality, it is greatly superior, and as a cropper it is one of the best. This peach originated in Canada, and therefore is extremely hardy, and has the very desirable character of fruiting at a very early age. Two-year trees often are well loaded with fruit.

peach uraginates the extremely hardy, and has the very desirable extremely hardy, and has the very desirable character of fruiting at a very early age. Two-year trees often are well loaded with fruit.

48. HILEY—This is the earliest commercial white-fieshed freestone peach. Large, handsomely colored and of excellent quality. Liked as a market fruit.

57. INDIAN—This is the old time Indian Clingstone, so much loved for peach pickles. Deep red skin, blood red fiesh; julcy; delicity flavor.

49. J. H. HALE—What Elberta has been and is, as a commercial fruit, J. H. Hale gives promise of being. In color, it is very smilar to Elberta, but the fruit is larger, more nearly as round as an orange, and is almost free from fuzz. In quality it is very much better than Elberta, being even more juicy, much sweeter and without so much of the bitter tang that characterizes Elberta. As a market fruit, J. H. Hale is rapidly becoming one of the leaders.

50. OLDMIXON FREE—An old, white-fieshed variety of good flavor; once a good market sort, but dropping in favor because of the uncertainty of its crops.

51. ROCHESTER—A new, very early, yellow-fieshed peach of the Crawford type. It is beautiful in appearance; its fiesh is deep yellow, tinged with red next the free stone, and it holds up well after being picked. It is high in quality, being one of the best flavored of any peach, and it ripons early, ahead of Early Crawford, Elberta or other well known yellow peaches. This makes it very valuable for the home sarden, and for the commercial planter, because it is the early kinds that always get the best prices. Plant a few Rochester peaches this year and find out for yourself just how good this new variety is.

52: TRIUMPH—An extra early, yellow-fieshed peach with a very fuzzy, dark red skin. Semi-cling. Valuable chiefly because of its earliness and hardiness.

## Select Summer and Fall Peaches

is much appreciated for home use because of the delicious preserves and spiced peaches that can be made from it. The fruit is greenish white in color, slightly blushed on the sunny side. Flesh white, juicy, meaty, good. Tree somewhat tender in bud.

5. CROSBY—A round yellow peach with a mottled cheek. Large size, especially when the trees are well fertilized and the fruit thinned; delicious, rich and one of the sweetest and best quality of all the yellow peaches for eating or for canning.

The tree is an open grower, somewhat inclined to overbear. Extremely hardy in wood and bud, and on that account is a good variety in cold climates.

## Arkansas Beauty Peach

Here is one of the peach gems from the "Heart of the Ozarks." It is one of the surest

It is one of the surest of peaches to bear; of the finest texture and superb flavor. It is a grand variety and will show its worth in either the home or commercial orchard. It is a freestone; white skin with a beautiful crimson blush, and a very meaty peach, as the fruit is large and the pit small. If you want a really fine freestone, peach

freestone peach, include some of Arkansas Beauty in your order. Price, 50c Each

## PEACHES—Continued

65. COMMON SEEDLING PEACHES
Many persons like to have a few
seedling peaches about the place, feeling that seedlings are more liable to
have a crop in years of late frosts than
are other kinds. We can supply
seedlings, but there is no certainty, have a crop in years of late frosts than are other kinds. We can supply seedlings, but there is no certainty, when these trees are planted, as to what the fruit will be like. Occasionally there is a really fine sort discovered among seedlings, but usually the fruit is of very small size. 60. HEATH CLING—An old, well known favorite for preserves and pickles. One of the latest to ripen. Flesh white; sweet, rich, vinous. A good variety for home use and on local markets.

61. KRUMMEL (Krummel October)—This is a large, round peach, one side a little larger than the other. A rich golden yellow color, blushed with carmine. Flesh is yellow, tinted red at the pit. Erim, melting, subsacid and refreshing. Good in quality and a good shipper. The tree is hardy, healthy and strong. It comes is a favorite in

into bearing early and is a favorite in the Southern peach districts as a market peach. It also is grown and is largely planted all up and down both the At-lantic and Pacific coasts where a very late peach is wanted. Its ripening sea-son is four to five weeks after Elberta.

43. SLAPPEY—
Here is a peach that usually ripens in late July, at a time when the market is bare of good peaches. The tree is a thrifty grower, very hardy and a heavy yielder. The flavor of the fruit is excellent; it has splendid keeping qualities and is resistant to rot in rainy weather. No

Slappey

resistant to rot in rainy weather. No better shipper has yet been introduced; ripens thoroughly to the seed; very sweet, yellow flesh marked with darker shades. The secret of success in peach growing depends on the right selection of varieties. Slappey is one of the best. It is a free-

pends on the right selection of varieties. Stapper is one of the best. It is a free-stant best of the control of the best. It is a free-stant shipper. The tree is and strong. It comes a much finer flavor which have put Smock into the background. In tree characteristics, Smock is about all that could be desired, but in spite of the fruits lacking in both quality and appearance, many persons prefer this variety because of its certainty of cropping. It is one of the latest yellow-fleshed freestone peaches, and is excellent for freestone peaches, and is excellent for 3.00 \$2.50 \$15.00 \$15.00 \$40c \$3.00 \$20.00 \$15.00 \$30.00 \$20.00 \$30.0

Krummel

62. LEMON C LING—
Large in size, firm in flesh, fine grained and of splendid quality. Preferred by canners, and is laregly grown for that purpose.

55. LATE CRAWFORD—

The fruit of this good variety is very large, roundish, resembles Crawford Early, but is nearly a month later in ripening. It is one of the best known of peaches, and is found in many markets. Its excellent quality makes it a splendid sort for the home orchard. It is a favorite commercial peach in many localities, as it is a good shipper. Elberta, however, has crowded Late Crawford out in many places, although the latter variety is superior for canning and preserving. It ripens fully a week later than Elberta. On heavy clay land, Late Crawford is often a great money maker, as on such soils it fruits a bundantly. But on lighter soils it is a shy bearer.

58. NIAGARA PEACH—One of the best medium early yellow

lighter soils it is a shy bearer.

H—One of the best medium early yellow introduced for many years past is the Niagara. It originated in Niagara County, New York, and has been grown there for about ten years past, but only in a small way, until very lately. The fruit of the Niagara peach is much like that of Early Crawford in appearance, being large, oval, yellow with brilliant red cheeks. The flavor is rich and piquant, reminding one of the very best peaches he ever ate. The season is medium early, coming in just before Eiberta.

SALWEY—Salwey is a large, roundish, yellow peach with a bright crimson cheek. Flesh a deep yellow, red at the pit, very sweet, juicy and good. Freestone, The tree is a large grower, hardy vigorous and productive. Bears third to fourth year. The fruit properly in the most northern states. Salwey and other late ripening varieties should be planted more largely, giving a longer season of ripening and selling the crop. The Salwey is a large grower and productive. ing and selling the crop. The Salwey, more than any other peach, can be picked when green and it will ripen in storage or on the way to market.

64. STINSON (Stinson October)-A large, white clingstone, popular in the South. Fruit too tender for distant shipment, but delicious for home use. It is a little earlier in ripening than other late white cling peaches, and is preferred on that account.

more than one hundred years. It 53. STUMP—This is another one of those good, old time peaches that has dropped backward in popularity because its cheeks are not painted quite so highly as some other kinds. When just right, the flavor and quality is excellent, but when the fruit becomes over-ripe, it loses its juiciness. Stump is a fruit for the home orchard and local market as it is too tender for distant shipment. The tree is excellent in shape, vigor, hardiness and productiveness—ideal for the home orchard.

ORDERING MORE TREES

I am writing to you in regard to the trees I ordered some time ago. I am so well pleased with them that I am ordering more. The trees came just like you said they would. If I live to see next fall, I will get a larger order of trees.—SAM SANDERS, Texas.

EXTRA FINE ROOTS

Got the trees. Thank for the prompt shipment. They are nice, with extra fine roots. If you will send me your catalog at once and promise to ship me a few trees on receipt of my order so I can get them set before Christmas, I will send you another order.—J. K. SHELTON, Tennessee.

GAVE SATISFACTION

Received the fruit trees all right and I am glad to tell you they have given perfect satisfaction. I have planted them. Am now writing to get your catalog for another order.—A. J. TURNER, Alabama.

sure was well pleased with
them. They reached us in
good condition, and am thanking you very much for the
order. Was surprised to see
such fine plants.— JOHN
GOFORTH, Missouri.

GARDEN SEED 700 GARDEN SEED 700 glad to cay I am well GARDEN SEED an well pleased with my trees. They are fine, and I will always buy from you hereafter. I had purchased my garden seed when I learned of your company. Wish I had known of you in time so I could have bought from you.— John BYRD, Mississippi.

Grown In The Meart of The OZARKS The Land of the Big Red Apple

Early Richmond

Almost before winter has passed, the cherry tree spreads its canopy of white, to entice the bees, and to hold forth the promise of abundance for the season.

Then comes the crimson, juicy fruits in June—fruits almost without equal for pies—fruits that so readily lend themselves to canning, the pantry shelves may fairly bend under the loads. How delicious the canned cherries taste when winter's winds how! As a fruit for the home orchard, cherries are superh. The trees are among the most ornamental for the lawn, and indeed, may be used to advantage for purely decorative purposes. Their garland of white, coming so early in spring, is a real harbinger of good cheer. Then when their branches bend under the loads of ripening crimson hued fruits, few trees are more beautiful, and at the same time afford a fruit of such excellence for so many purposes. For the commercial grower, cherries are great profit makers, rarely failing to produce a heavy crop and always bringing profitable prices on the market.

prices on the market.

105. COMPASS CHERRY—This tree produces the first year after planting. When the Compass Cherry was first introduced, it was given a wide berth by most nurserymen, but in the last few years it has been taken up in all sections of the country and put into the best fruit lists. It bears invariably at two years old and bears large quantities of most excellent fruit. In size it is larger than the Early Richmond cherry. The quality is between the cherry and the plum. This perfectly hardy fruit was originated at Springfield, Minn., and is a cross between the native Sand Cherry and the American plum. The fruit brings the best prices of any on the market, and the demand has never been supplied. Anyone planting trees should not be without the Compass, and then you would never be without good fruit.

week ahead of Early Bichmond. It is better in quality than that variety and fully as productive.

107. EARLY RICHMOND—A most popular variety for home growing, as it is one of the surest croppers, ripens early, and its bright red fruits are of most excellent flavor. It is an excellent pie and canning cherry, and when the fruits are fully ripe they are delictious to eat out of the hand.

109. ENGLISH MORELLO—The tree of this variety is an especially fine one for ornamental purposes, as it is dwarf in growth. The fruit ripens very late; extra large in size; almost black in color; of excellent flavor, but too sour for pleasant eating out of the hand. It is the favorite late, sour cherry.

108. LARGE MONTMORENCY—The best, the most popular, and without doubt the very finest in every way of any cherry adapted to the Middle West. The fruits are very large in size and ripen fen days or two weeks earlier than Early Richmond. They are of much darker red color and much superior in flavor. This fruit is ideal for canning, the finest of all for ples, and possessed of a flavor that is simply superb. If you want a few cherry trees for your yard, where the children can have all the cherries they want to eat, buy this variety. If you want to grow cherries for market, you can put your dependence on this, and be sure you are growing a profit maker.

111. BLACK TARTARIAN—The most fruitful, healthful and vigorous of the sweet cherries that are adapted to the Middle West. Fruit of medium size, almost black, and of most pleasing taste.

Our Prices 2 to 3 feet; 10 for \$4.00; each 3 to 4 feet; 10 for \$7.50; each 80¢.

# Pears the Quality Fruit

Pears are famous for the great delicacy, the mildness, sweetness, deliciousness of the melting, buttery, juicy fruits. They combine the lusciousness of the finest of peaches with the character of the apple, forming fruits of amazing goodness. In many parts of the Great Lakes region and on the Pacific coast, pears are grown in a large commercial way, and have become one of the important fruit crops. Throughout the central part of the country the pear is primarily a fruit for the home orchard.

And what a luscious fruit is is. Delicious for eating out of the hand, and even better when made into preserves or marmalade, or canned in a heavy syrup. In the opinion of many, pears are really finer in flavor when canned or preserved than when eaten fresh. But for either purpose, the fruit should be picked from the tree several days before it matures and be permitted to ripen in a cool cellar. Its flavor then is much superior to the tree ripened product. Plant a few pear trees in your home orchard and enjoy the lusciousness of fruits of your own growing.

Riant a rew pear trees in your home orenard and enjoy the lusciousness of fruits of your own enjoy the lusciousness of fruits of your own enjoy the lusciousness of fruits of your own entoy.

38. ANJOU—A large, heavy, yellow pear, often shaded with dull crimson. It has a short, chunky neck, tapering slightly toward the stem. The fissh is splendid shipper. The tree is an upright grower, very vigorous, hardy, long-lived and productive, and invariably has a crop every year.

90. BARTLETI—Beautful, large yellow fruits of excellent large. Fine for eating and cooking; probably more extensive. Fine for eating and cooking; probably more extensively. In this locality, as if is the most largely grown of all pears blight. The fruit is large to very large, rich yellow in color, oval, "pear" shape, although sometimes tapering nearly as tree is a remarkably strong grower, vigorous, very productive, and favor, but ripens metal as to the stem end. The Ki-orer shape, although sometimes tapering nearly as tree is a remarkably strong grower, vigorous, very productive, and favor, but ripens were all days earlier. Grows best on the large of the goods back productive and favor, but ripens were all days earlier. PRICES

5 to 4 feet.... 60c Each LEME.—The fruit of this variable is the largest in size of commonly grown pears.

Good to excellent in quality. Tree a good grower, heavy and regular bearer. One of the best to plant.

96. EARLY HARVEST—The chief value of this fruit is its earliness. Fruit large, early; quality only fair. Tree of straggling growth.

97. FLEMISH BEAUTY—Handsome in appearance, excellent in quality, but very subject to blight and scab. Worth growing in home orchards where it can be given the necessary care.

93. GARBER—A large, roundish, oblong fruit, tapering toward the stem end. The skin is yellow when ripe, and sometimes has a red cheek. The fiesh is firm, julcy and of fair quality when eaten out of the hand, but of much excellence when canned. The tree is very strong, hardy, vigorous and very resistant to blight.

94. SECKLE—Equalled by no pear in the high quality, sweet sugary flavor. Good producer; healthy. Fruits small, reddish brown in color, ripen early.

98. WILDER EARLY—Bright lemon yellow with red cheek; very attractive. One of the best summer pears.

99. VERMONT BEAUTY—Fruits similar to Seckle in flavor, but much larger in size and better appearance. Ripens late. Excellent for home or market.

## PLUMS—The Superb Jelly Fruits

To my taste, nothing nicer can be served with roast pork or roast lamb, than a liberal helping of plum jelly! It is simply delicious. And there are so many different kinds of plums, that the varieties of

centious. And there are so many different kinds of plums, that the varieties of jellies seems endless. Except in a few localities where plums are grown on a large commercial scale, plums are altogether a home fruit—just a few trees in the yard will produce an abundance of fruit for eating, for canning, jellles and preserves. They are the easiest of all fruits to grow, requiring but little care and rewarding almost every year with a profusion of fruits. But plums, like any other fruit, respond best when given the best care. As shade producers for the chicken yard, no tree is more popular or better adapted than plums. The poultry aid in keeping down troublesome insects, while their dusting places under the trees serve to stimulate the growth and fruitfulness of the plums. Here are some of the best varieties for home use in the Southwest: use in the Southwest:

use in the Southwest:

74. ABUNDANCE — Medium to large; round, pointed; skin greenish yellow, overlaid with dull purplish carmine; flesh light greenish yellow, uitov and sweet, with a slight apricot flavor; oling; quality best; pit small; strong-growing, upright, very prolific. More extensively planted than any other of the Japanese plums, It is one of the most popular and prolific early sorts in the plum-growing sections of the North.

75. BURBANK—The best of all the Japanese plums; nearly globular, clear cherryred, with a thin iliao bloom; the flesh is a deep yellow color, very sweet, with a poculiar and very agreeable flavor; tree

vigorous, with strong, upright shoots, large, broad leaves; begins to bear usually at two years. It blooms late, and consequently immore likely to escape the late spring frosts.

76. GOLD BEAUTY—A large variety in a rich yellow. Flesh is very firm and sweet; always in big demand.

always in big demand.

77. POOLE PRIDE—Fruit of attractive appearance, about an inch in diameter; clear, bright red; fiesh yellow, julcy, sweet, with a strong, peculiar favor. Bipens early.

78. RED JUNE—A very handsome plum, about a week earlier than Abundance. By all odds the best Japanese plum ripening before Abundance. Medium to nearly large size, deep vermilion red, with handsome bloom and very showy; fiesh light lemonyellow or whitish, firm and moderately julcy, very slightly subacid to sweetish, of good, pleasant quality; pit small; tree upright, spreading, vigorous and hardy, and as productive as Burbank.

79. SHIRO—The Shiro is a brilliant,

79. SHIRO—The Shiro is a brilliant, transparent, yellow plum, large, round, tapering slightly at the end, covered with a thin

bloom. Flesh, light yellow, and the thin, clear skin adds to its translucent appearance. It is good quality, very julcy, sweet and mild. The tree is large, upright, spreading, vigorous and hardy, except in. very cold localities. There is no other yellow plum that has the brilliancy and beauty of the Shiro. The quality is good, very pleasant and it ships well when picked before maturity. Splendid plum for the home garden and commercial planting.

80. SHROPSHIRE DAMSON—Larger and better flavored fruits than the old Damson. Fruit about an inch in length, dark purple, overlald with a heavy bloom. Very productive. The finest of plums for preserving, making a heavy, rich, delicious preserve.

as wilckson—A plum of the Japanese type, producing the largest fruit of any plum in this region. The skin is dark red over a yellow ground; the flavor of the fully ripe fruit is very fine; sweet and delicious, with a distinct flavor quite unlike any other plum. This variety is excellent for canning, making a splendid sauce. The tree is a splendid grower, wide spreading and a good bearer. good bearer.

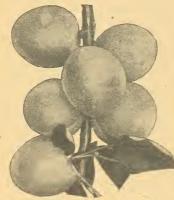

good bearer.

32. WILD GOOSE—The best known and most popular of the American type of plums. The fruit is of brilliant red color, somewhat egg shaped; ripens early, and is excellent for eating out of the hand, for canning or jelly making. The tree grows well and bears heavily. It is very ornamental when in bloom, and because of its abundant follage, makes a beautiful ornament on the lawn. A splendid tree for use in the poultry yard.

## APRICOTS—Of Course You Can Raise Them

Moorpark

Many persons in this Middle Western country seem to think the only place where apricots can be grown successfully is on the Pacific Coast. But it can be fruited almost as well right here in the Midlle West, or any place where peaches can be grown. It is one of the most delightfully luscious of fruits. It is remarkable that such a rich and beautiful golden, sweet fruit is not more largely planted, especially for home use, where they may be eaten right off the tree, or canned or made into ples. Fresh apricot ple is wonderfull The culti-

vation and care of the apricot is just about like that of the peach, and it is just as productive. Because of the great beauty of its bloom, and the earliness of its blooming, an apricot tree on the lawn is a grand sizht during the warm days of early spring. It is worth planting as an ornament, if for no other research. er reason

other reason.

100. ALEXANDER—Orange yellow, coarse, juicy, sweet, fair quality midseason.

75¢ Price, each.

101. EARLY GOLDEN—Ripens early, fruit small, round, moderately juley and sweet. Makes a large, productive tree. \$1.00 Price, each \_\_\_\_

102. ROYAL—The variety most largely grown for commercial purposes. Not so good in flavar as some, but being more fruitful and ripening early. 75¢ Price, each.

and best size of all. Price, each 104A. SEEDLING RUSSIAN APRICOT—
A most delicious fruit for home growing.
Is of a distinct flavor and one of the best and mest profitable market fruits. The tree bears very young and most profusely, Ripening, as it does between the cherry and peach, the apricot is the most welcome fruit. The tree is slender in frem, has beautiful dark green foliage, pretty pink talossoms, and will give very satisfactory results as an orenmental tree in garden or house lot. You will find the Russian Apricot very hardy. It will pay you to plant a few apricots about the place for home use. 50¢

#### QUINCE

88. ORANGE—The leading commercial quince. Tree very vigorous, hardy, productive and about the most resistant to blight. Fruit roundish, very fuzzy, ripening early; pale yellow when ripe, but cooking to \$1.00 a rich red color. Price, each.

#### NECTARINE

This fruit is identical with peaches in every way except that the skin is smooth and glossy like a plum. As a novelty for the home orchard they have a distinct place, but are little grown for market.

86. RED ROMAN—The fruit is large, or greenish yellow color and brilliant red cheek. Flesh yellow, tender, rich and a spicy peach-like flavor. Fine for home planting. Price, each 50¢

87. NEW WHITE—In appearance this fruit is quite like a Carman peach. 50¢

#### **PRUNES**

83. AGEN (French Prune)—Quaer small sweetest of all plums, h vlolet color, semi-size. Ripens later the plum in the color, semi-size. Glinostone German Prune—Large purplish-black fruits, ripening late. The thick, meaty, sweet flesh of this plum make it excellent for culinary purpress. 85. ITALIAN PRUNE (Fellemberg)—This is the leading plum in the northwestern United States, and the chief variety for drying into process. A good dessert plum and excellent for cooking. Thrives over a wide territory. Large pu

Strawberries Big Red and Juicy Fresh from your own Patch

### Spring Bearing Varieties

68. KLONDYKE—This is the leading commercial berry of the South, where it is grown more extensively than any other one variety. As a shipper it is among the best. It is a good plant maker and heavy cropper. Toward the end of the season the berries are inclined to run to small sizes. Its flavor is not the highest quality. Perfect flowered.

Prices, 100 for \$1.00; 1000 for \$7.50

69. LADY THOMPSON—An old home and market favorite. The fruit is of large size, flavor fine and greatly liked, but as a market berry its place is being taken by more productive kinds that ship better. Prices, 100 for \$10.00

\$10.00 \$1.50; 1000 for\_

\$1.50; 1000 for

70. DUNLAP (Senator Dunlap)—Unequalled for home use and local markets. A little too soft for distant shipping. Berries rather long and with a more or less distinct neck. Dark red all through; sweet, rich, juicy. Plants healthy, productive and a good plant maker. Perfect flowered. \$10.00

71. MICHEL EARLY—The earliest strawberry of good flavor. Fruit of fair size, good color and fine flavor and the best of its season for home or market. Prices, 100 for \$2.00; \$15.00

72. AROMA—This good berry has been one of the leading market varieties for a long period of years. It is of large size, chubby shape, firm and of good flavor. The berries hold their size well through the ripening season, and while lacking in some points of goodness for home use, it is a leader among shipping berries. Perfect flowered. Prices, 100 for \$1.50;

1000 for \$1.50;

73. GANDY—Handsome, deep red berries of very good quality and very late. In many locali-

ties preferred as a late shipping variety. Excellent for the home garden. Does best on heavy, moist soils. This variety has long held an important place in many localities as a commercial variety. Because of its late ripening it is an excellent home fruit.

Perfect flowered. \$15.00 Prices, 100 for \$2.00; 1000 for....

131. GIBSON—A new claimant for distinction as a shipping berry and finding much favor through the Middle West. Berries of large size, good shape, splendid color, flavor and aroma. Excellent for the home garden, and a good shipper. Gibson has leaped into popularity because it has so many good qualities that appeal to the home owner and the commercial grower. Try a hundred or so of them. Prices, \$1.50

WILL TELL HER FRIENDS

I received the strawberry plants and the Crimson Rambler rose and was more than glad to get them. I don't know what I can do for you, but I will tell all my friends about them and I will always remember you if I need anything in trees and seeds, I will order from you.—MBS. WILL BRANDES, Missouri.

NEVER STOPPED GROWING
The trees, plants, etc., received of you arrived in first class condition. Planted them the next day and they have never stopped growing.—GEO. F. WALLENMETEE, Kentucky.

ARRIVED IN GOOD SHAPE
I thank you very kindly for your prompt shipment of plants. They
reached me in good condition.—MRS. BESSIE JACKSON,

Mississippi.

NICE BERRY PLANTS

My strawberry plants are sure nice. I received them in good condition. This fall I will make an order for fruit trees of all kinds, as it is too late now.—ELLEN SEALS, Oklahoma.

There is Money in Strawberry Growing

### Everbearing strawberries

Everbearing strawberries came into prominence just a few years ago, but have made good everywhere. When you plant this wonderful strain of berries, you begin picking fruit the same summer the berries are planted, and keep on right up to freezing weather. They begin bearing again with the earliest of berries the next spring and produce continually through the summer. If you have never grown any of these wonderful berries, try some this year. A hourdred plants make a nice patch to start with.

66A.—AMERICUS.—One of the first of the everbearing kinds to obtain general favor. Its berries, while very good, are of small size. Good for \$25.00 home use. Prices, 25 for \$1.25; 100 for 3.00; 1000 for

66. PROGRESSIVE—This is the heaviest cropper of all evertearers. Its spring crop is as good as any of the standard spring bearing varieties, and the plants continue producing during the summer and autumn, yielding berries of good size right up to freezing weather. Berries of deep red color clear through, very sweet, rich and aromatic. A good plant maker and heavy yiolder. Prices, 25 for \$1.00;

\$20.00

SUPERB--The berries of this variety are the largest of all everbearers, and hold their size well through the season. The flavor is excellent, but the plants do not multiply as freely as with other varieties, thereby sutting down the yield. Well worthy of a place in the home garden. Prices, 25 for \$1.50; \$30.00

Progressive

#### Offer No. 1014 Grand Home SizeBlackberry Garden

For the home garden, no small fruit can beat blackberries. The glisten-ing, juicy, jet black fruits are simply superb with cream and sugar. Unequalled for pies; and what makes a finer spread for hot biscuits than blackberry jam!

This Grand Home-Size Blackberry Garden will give you enough plants for an abundant supply of delicious fruit. Our horticultural experts will send you varieties well adapted to your soil and climate. Every plant will be tip top and backed by our fair and square guarantee.

50 Blackberry Plants \$250
3 Choice Varieties, our Selection. Postpaid

berries as Early Harvest or Dallas. The fruit ripens two weeks ahead of Early Harvest and always commands a top price. Preferred by Southern growers. 1655. LAWTON—This big sturdy variety is one of the leading market berries of the Southwest. The fruit is of large size, jet black color, very sweet and ships well. Perfectly hardy and very fruitful. RATHBUN—The fruit of this variety is fine in size, and quality, but the plants rather weak and unproductively of a place in the home garden.

ROBINSON—A large, fine berry of vigorous habit in Lawton. One of the best for the Southwest.

flavor 165A. similar to Lawton.

RASPBERRIES

Blackcap Varieties

Blackcap Varieties

129. BLACK PEARL—A variety introduced a few years ago and its from the Missouri river valley in Kansas. Fruit large, jet black, heavily overspread with a blue bloom. The fruit is produced in large clusters, well supported on strong stems. They are meaty, rich and do not crumble when being picked. The plants are strong growers, productive and healthy.

130. KANSAS—Long popular as a market berry. Its fruits are rather deficient in size and inclined to crumble, but of good flavor. The plants are quite subject to anthracnose, causing it to decline in favor as a market variety.

133. CUMBERLAND—Next to Black Pearl this is the most largely grown of the blackcaps in the Middle West and Southwest. Its fruit of fine size, color and flavor; heavy cropper; healthy, although more subject to anthracnose than Black Pearl.

Red Varieties

122. BRANDYWINE—An old, popular variety Laving bright red fruits firm enough for shipping. Plants rather weak and tender. 125. KING—One of the best early reds, but a few days later than the preceding. Fruit of medium size, light red color, tender and the preceding. Frinclined to crumble

#### **CURRANTS AND GOOSEBERRIES**

Because of the Federal quarantine on currants and gooseberries, plants of these fruits cannot be shipped west of the west line of Arkansas, Missouri, lowa, etc.

FAY (Fay Prolific)—The best of the large fruited currants. Berries dark red, julcy, thin skinned. Bushes are dwarfsh and yield abundantly. A very fine currant for home use. PERFECTION—A vigorous grower, healthy and productive. Berries large, in jong clusters; bright, clear red and of very fine flavor. Of recent introduction, but because of its many merits is becoming one of the most popular. RED DUTCH—One of the oldest and best known currants, but giving way to varieties having larger fruits. Its berries are bright red, julcy and fine in flavor.

PEARL—Fruits of this gooseberry are larger and much better than Downing, and the plants somewhat more productive. DOWNING—An old gooseberry and one of the most widely grown. The fruit is of medium to small size, but so abundantly produced the total volume of the crop is large.

large.
HOUGHTON—This gooseberry stands
next to Downing in popularity. Fruit
somewhat larger in size, but not so good
in flavor, and in some localities the
bushes are more inclined to mildew.

## Choice Blackberry Plants

160. BLOWERS—A tall, vigorous productive variety notable for the long period over which the fruit ripens. The plants are hardy and the fruit is a good shipper in addition to being of high quality.

161. DALLAS—This is one of the best varieties for the Southwest. The fruit is of fine size, flavor and quality; the plants are vigorous and productive and the blossoms are preferred by many growers as pollenizers for the McDonald. It ripens mid-season.

nerred by many growers as pollenizers for the McDonald. It ripens mid-season.

162. EARLY HARVEST—The carliest of the true blackberries. Plants are small and the berries have the appearance of mulberries, but possessed of a most excellent flavor, very delicious for jams because of the small, soft seeds. It is one of the best for the home garden, and a splendid market variety. Tender to extreme cold.

163. McDONALD—A blackberry-dewberry hybrid having all of the desirable characteristics in fruit of the best blackberries, but with imperfect flowers. It must be planted with some dewberries, or such black-The fruit ripens and always com-

126. LOUDON—Long a dependable variety, and still one of the best for every purpose. Hardler than Cuthbert, but not so good in quality, and plants more subject to crown gall.

127. CUTHBERT—This is the most largely grown of all red raspberries, and thrives over a great range of soils and climates. Berries of bright, attractive color; of rich flavor; productive; ripens mid-season.

132. EARLY KING—This is an extra early variety, ripening several days shead of Cuthbert. It is a strong grower, producing many erect canes. Berries of fine size, bright red color; splendid flavor.

Everbearing Red Raspberries

128. ERSKINE—The fruit of this variety is very good, and the production continues more or less throughout the summer, with a fairly heavy crop in autumn. But the plant is very subject to crown gall and it is probable that we shall discard it after this season on that account.

#### DEWRER IDS

135. LUCRETIA—This is the best known and most widely grown of dewberries. The vines are trailing, and in colder climates need winter protection. Fruit early, jet black in color, of good size but somewhat insipid. A good pollenizer for McDonald.

144. PREMO—A new variety, much like Lucretia, but ripening a week or ten days earlier. Fruit large, jet black, sweet and delicious and possessed of quality that makes it certain to meet with favor as a home and market variety.

144A. MAYES (Austin)—Characterized by its very large, black, highly flavored berries. One of the finest, and its canes are more upright in habit than most dewberries.

dewberries.

## lanere [St. Regis] Raspberry Bears Fruit for Four Months

TER LETT A

struct tac BIFFUE

128A. RANERE (St. Regis)—This is the wonderful Everbearing Red Raspberry you have heard so much about. Fruit commences to ripen with the earliest varieties of red raspberries, and continues to produce fruit during the summer and fall, right up to freezing weather. Ranere is exceedingly hardy, even in the extreme North. The fruit is of bright crimson; large, rich, sugary and of the best flavor, and produced in abundance. It is the only red raspberry that yields a crop the first year. Plants set in the spring bear that summes.

Strong, selected plants, prepaid, \$1.00 per dozen; \$1.75 per 25; \$3.50 per 50; \$6.00 per 100; postpaid.

## GRAPES-The Tonic Fruit

There's health in grapes. They are Nature's tonic fruits! A favorite with the folks in ancient times. More popular today than in any age. Grapes are the juice fruits de luxe. Grape juice, the most delicious of beverages, health-giving, refreshing, strengthening, nourishing. Liked by all. Splendid for the children.

beverages, health-giving, refreshing, strengthening, nourishing. Liked by all. Splendid for the children.

No home yard is too small for at least one grape vine. Train it over the sunny end of the porch where its refreshing shade may be enjoyed on hot days—where the sweet aroma of the ripening fruits can float through the house—where you can eat the julcy fruits.

There is big money in growing grapes for market.

There is big money in growing grapes for market.

There is big money in growing grapes for market.

The demand is constantly increasing and prices are mounting higher and higher. Grapes thrive almost anywhere, in any soil or any climate, and higher. Grapes thrive almost anywhere, in any soil or any climate, and higher. Grapes thrive almost anywhere, in any soil or any climate, and higher. Grapes and bundant supply for home use, or market—enjoy the profits, enjoy the delicious juice, jam, and jelly you can make from them.

112. BRIGHTON—Bunch large, shouldered; berries medium large, dark red, tender, rich, sweet and of best quality. Vine vigorous and hardy.

Price, 10 for \$2.50; each

113. CAMPBELL EARLY—Black with purple bloom; bunch and berries large.

114. CONCORD—The most popular grape in America. They grow in full clusters of large berries, with a thin skin; fiesh tender, sweet and julcy.

Vine a strong grower and very hardy. Price, 10 for \$2.50; each

116. DELAWARE—One of the finest table grapes.

Bunches not large; compact and well shouldered.

Burches not large; compact and well shouldered.

Succession and cultivation reduce and cultivation reduce and cultivation reduce.

Berries rather small, julicy and sweet, without any hard pulp. Price, 10 for \$2.50; 100 for 30¢ \$20.00; each

116. IMPROVED DELAWARE—Much larger and better grape than the Delaware. The vine is a hardy, vigorous grower. A very fine delicious table

\$25.00; each \_

\$23.00; each

118. MOORE EARLY—An extra large grape of
extraordinary fine sweet flavor. Excellent for home
use and one of the hardlest for the far North, ripening about two weeks ahead of the Concord. Berries
of large size; succeeds everywhere. A fine market

berry. Price, 10 for \$3.00; 100 for 35¢ \$25.00; each\_\_\_ 35¢

Offer No. 1014 A Backyard Vineyard for 12 Big Vines Our Selection, 2 Varieties

Grapes are as old as history. Everyone loves them. No home ever has enough. As a health-giving fruit, grapes have no equal. They are the finest fruits to eat out of the hand. equal. They are the linest truits to est out of the nand, Grapp jelly is simply superb. Grapp jam, marmalade, spread—where is the school boy or girl that doesn't love it? And grape juice, the most palatable, healthful and delicious of beverages. Every home where there are children should have an abundance of grapes just for juice making purposes. The an abundance of grapes just for julce making purposes. The juice, used freely, is far more healthful for growing children, and much more palatable than all the "soda pops" made. And think of the insignificant cost when it is made at home. Don't miss this opportunity of having these fine, 1-year vines—12 vines, 2 varieties—while you can get them at this money-saving price. Express charges collect.

# The Wonder Grape

Absorbs More Iron from the Soil Than Any Other Plant Known

The juice of this grape is one of the most healthful and health-restoring beverages that can be procured. No other grape compares with it. Read the following letter from W. H. Morse, M. D., Consulting Chemist of Hartford, Conn., and Fellow of the Incorporated Society of Science, Letters and Art, of London.

of London.

Gentlemen: I understand that you are promoting the Cynthiana Grape. I do not know any particulars further than this, but this is sufficient to make me felicitate you if it is the case. I will tell you why I do so. Briefly, the juice of the true Cynthiana Grape is most notably valuable as being a ferruginous tonic. There is "grape juice" galore in the market that is of no real tonic value—good beverage, beyond a reasonable doubt, but not of any value as of avail as facilitating constructive metamorphosis. So if I were writing on "A Preference in Grape Juice" (to Mr. Bryan, perhaps,) I should suggest getting it from the Cynthiana Grape. I hope you are selling the vines, and in every case of sale, it seems to me that you would do well to especially emphasize the juice as healthful and health-restoring. Heartfully yours,
W. H. MORSE.

Don't buy patent medicines for your ills. Grow Cynthiana grapes and drink the juice. Most pleasant of all. Rich in iron. Sweet with Nature's sugar. Healthful.

Strong 1 Year Old Vines, each 5 for \$2.00; 25 for \$6.00

Milita

Booklet "How to Make Grape Julce" with each order for 25 or more vines.

173. ENGLISH WALNUT — Our trees have been thoroughly tested. soil that will grow will grow apples is pretty sure to grow English walnuts. These nuts sell at 40 to 60 cents per pound. Two or three-foot trees usually give the best results.

Price, each \$1.50

## NUTS

174 BUTTERNUT—A fine native tree, producing a large, longish nut, highly prized for its sweet, oily, nutritious kernel which resembles the flavor of the black walnut. The butternut is one of our native nut trees that has been very much neglected under cultivation. But it has so many desirable qualities, especially in the food value of the nuts that it is certain to be grown in a commercial way \$1.00 some day. Price, each \$1.10 some day. Price, each \$1.00 some day that the pecan, the native black walnut is the most desirable and profitable nut tree for all localities east of the Rocky pecan, the native black walnut is the most desirable and profitable nut tree for all localities east of the Rocky Mountains. The nuts are bringing better prices every year as they are being more and more extensively used by confectioners, bakers and the general public. Black walnut trees are well worth growing in a large way for lumber purposes. Good black walnut logs are the most valuable of our native timber trees. Plant our Black Walnut trees just as liberally as you can. Price, each 1910 the Rocky Walnut trees is the state of th

AMERICAN — The fruit of this well-known native tree need hardly be described. We believe it is considered by all to be the best of all nuts, whether native or foreign where an ahundance of nuts are desired, two or more chestnut trees should be planted close together to effect pollination. The trees are very shapely and make excellent shade trees on the lawn.

Price, each \_\_\_

176. FILBERT—Tree of easy culture, succeeding well in almost any soil. Bears early and abundantly. Nuts almost round, rich and of excellent flavor, resembling the appearance and taste of the native hazel nut. Try a few of our filbert bushes. Price, each... 50¢

## Novel and Arkansas Native Fruits

147. ARKANSAS SEEDLING GRAPE— This is not a common "wild" grape, but an unnamed black seedling of good size, fine flavor and a splendid bearer. 25¢ 

Price, \$2.00 per doz.; each

149. SNOW PEACH—This peach is listed here, as it is strictly a novelty. The fruit is snow white, of medium size; the twigs are green and the blossoms large and pure white. The trees we offer are selected seedlings. Price, \$2.00 per doz.; 256. each\_

each
150. ARKANSAS SEEDLING CRAB APPLE—Bemarkably hardy. Fruit of good
size and of especial value for jellies and
preserves. Price, \$3.00 per dez.; 35¢ each.

ARKANSAS NATIVE PERSIMMON The Ozarks of Arkansas are abundantly provided with persimmons—a wild fruit that is much liked because of its unusual flavor. We have a seedling that produces large fruits of fine quality.

Price, each

152. GIANT HIMALAYA BERRY (Rubus thrysanthus)—A rampant grower, almost evergreen, and should be given an abundance of room. The berries are large, coarse, pulpy blackberries, with a flavor all their own. Desirable as a novelty, but not a commercial fruit.

Price, \$1.50 per dez.; each
153. STRAWBERRY.RASPBERRY (Rubus rosasfollus)—The fruit of this plant bear rather a striking resemblance to strawberries, yet the plant resembles a red raspberry, hence the name. It is a nov-Price, each\_\_

#### Japanese Persimmons

The fruit of the Japanese persimmon is a great deal larger and of much better quality than that of the native American persimmon. It should be better quality than that of the native American persimmon. It should be gathered just before frost and ripened in a cool dark room. This method adds much to its flavor and lessens, if not entirely removes, the mouth puckering which most of us connect with persimmons. Not only is the fruit superior to that of the native persimmon, but the trees as well make beautiful ornamentals in any planting. Hardy only in the warmer parts of the South. Each. \$1.00

city that is much appreciated by those who delight in having some unusual things in their garden. Set out a few of these plants in your yard. You will appreciate them because of their novelty.

10¢
154. WINEBERRY (Rubus pheenloolasius)
—An interesting plant with fruit resembling the red raspberry in appearance and a flavor like that of red and black raspberries combined. The plants are tall growers, fairly productive and interesting in appearance. The fruit is deliclous for cullnary purposes and quite palatable when fresh.

15¢ and quite palatable when frean. 15¢
Price, \$1.50 per doz.; each
155. ARKANSAS HUCKLEBERRY—This
little native fruit of the Ozark region is
relished for use in jams and pies. It has
a most delictous flavor, bears abundantly,
and when given reasonable care it yields
regularly and will grow in almost any kind
of soil. This little fruit has great possihiltitias for development as a commercial 15¢ of soil. This little fruit has great possibilities for development as a commercial fruit of importance. If you like to experiment with the breeding and improvement of fruits, this is one that is worthy of serious attention. Try some of them. 15¢

MULBERRIES

**\$100** Each

166. DOWNING—This popular variety is a good grower and \$1.00 bears heavily. 167. HICKS—A fine grower and heavy bearer. Ripens through Ju July and August. \$1.00 Each. 168. ABUNDANCE—Very large, black, handsome; a sweet, rich and \$1.00 excellent variety. Each \$1.00

#### RUSSIAN MULBERRY

169. RUSSIAN—This tree has been planted very extensively in the western states for the past fifteen years, and we know of no other tree that will stand as much drouth and neglect and yet make a good growth each year. It makes a very good shade tree, holding its leaves late into the fall; and for a hedge, without thorns, it has no superior. Trees commence to bear at two years old; fruit resembles the blackberry, and will ripen from July to first of September. Each

156. CRYSTAL WHITE BLACKBERRY—Barries of fine, translucent white, of good stze, sweet and pleasant. Canes prolific but not entirely hardy. Should be planted near other kind of blackberries to effect pollination. This blackberry is much more than a novelty. It is a fruit of merit and is very desirable for a fancy market trade. Price, \$1.00 per doz.; each 10¢

"ARKANSAS BANANA" or PAW PAW (Asimina triloba)—A native fruit three or four inches in length and two inches in diameter, of banana-like appearance and peculiar buttery texture. Considered deli-clous by many, and certainly worthy of a place in the garden of those who like un-usual things. The bush is very ornamental, having follage of rather large size and tropical appearance. \$1.00 Price, each .

PRUNING APPRECIATED I will take the pleasure in writing to tell you how well pleased I am with the trees. General directions for planting and the trees pruned ready for planting was very much appreciated.—A. F. SHELTON, Texas.

Figs For The Garden

Figs For The Garden

177. FIGS—Brosh figs are delicious when served with cream and sugar. When preserved in a heavy syrup, few fruits are so delicious. In the warmer parts of the South fig bushes are hardy and bear profusely, and no fruit except citrus has greater commercial possibilities. In the southern-part of Arkansas and the region east and west figs are often killed to the ground in winter. But they will send up many strong shoots and produce an abundance of delicious fruits on the new wood. If you live where figs will grow plant a few of our strong bushes.

Price, each \$1.00

# ARKANSAS SEED &

PRIVETS FOR HEDGES

Few things about the yard can be more attractive, or give greater satisfaction than a hedge of privet. It gives the grounds a charm not obtainable from wire or picket fences, and adds a touch of privacy and real charm. In the warmer parts of the South, privets are evergreen or semi-evergreen, but deciduous in the North. As a fence for the yard, the privets are of great beauty; inexpensive to plant; endure for many years and are cheaply maintained.

951. CALIFORNIA PRIVET—Very vigorous grower. Foliage glossy green all summer, becoming deep purple in autumn. Not reliably hardy in the North.

950. AMOOR PRIVET—Evergreen in the South; hardy in the North. Forms a most attractive and durable hedge. When not trimmed closely, produces a profusion of white flowers.

Just go through the following list shrubs, trees and hardy flowers, pick out the kinds you like and SEND YOUR ORDER NOW. In just a few weeks you will be enjoying the beauty of leaf and bloom, and set your home off most attractively.

ORNAMENTAL SHRUBS

901. ABELIA GRANDIFLORA (Glossy Abelia)
—A beautiful evergreen shrub, hardy in this latitude, having dark green, glossy leaves, becoming bronzy in winter. Flowers white, funnel shaped, tinged with pink, borne in clusters; delicately

bronzy in winter. Flowers white, lumies snaped, scented.

902. ACANTHOPANEX PENTAPHYLLUM—A shrub of medium height, with long, slender branches; leaves deeply lobed; flowers greenish in umbels. Very ornamental and useful.

903. AMORPHA FRUTICOSA (Indigobush)—A large, spreading bush with pinnate leaves; flowers in slender spikes, deep purple in color, coming in early or mid-summer.

907. BERBERIS THUNBERGI (Japanese Barberry)—A dwarf shrub with small leaves which turn to brilliant hues in autumn. Blooms inconspicuous but forming bright red berries that hang until late winter. Excellent for massing or for a hedges, making an impenetrable and a hedge because of the thorniness dicket of the branches.

of the branches.

910. BUDDLEIA (Magnifica),
Orace - Butterfiybush—A most
beautiful shrub, and one that
should be widely planted for its
profusion of bloom in late sumer and autumn. Blossoms in
long spikes, small sweet scented
and very attractive to butterflies. The plant sometimes
freezes back to the ground in
the North, but comes up again
from the roots. from the roots.

CARYOPTERIS INCANA 912. CARYOPTERIS INCANA
(Bluebeard) — Of vigorous
growth, producing flowers of
rich lavender or sky blue color
in great profusion the entire
length of the branches. The
canes frequently die to the
ground in winter, but come
again from the roots.

again from the AVIVANTHUS FLORI-DUS (Common Sweetshrub)—A Mock large, vigorous shrub having decidedly ornamental foliage. The leaves and twigs are sweet scented when crushed or broken. Flowers in the axils of the leaves; deep chocolate colored and of spicy

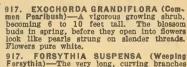

featrance.

914. DEUTZIA GRACILIS (Slender Deutzia)—A splendid and useful low growing shrub of graceful form. In spring its canes are densely clothed with white star-shaped are densely clothed with white star-shaped flowers.

915. DEUTZIA SCABRA CRENATA (Fuzzy Doutzia)—A sturdy, bushy shrub that is a mass of bloom in late spring. Flowers single, white.

916—DEUTZIA (Pride of Rochester)—The most popular of all the taller growing Deutzias. A splendid grower and a profuse bloomer.

Flowers about half an inch long, very double; pure white, with the outer row of petals tinged with pink.

917. FORSYTHIA SUSPENSA (Weeping Forsythia)—The very long, curving branches of this shrub adapt it to covering arches and trellises, where its bright blossoms light up the landscape with glinting masses of, yellow in spring before the leaves appear.

yellow in spring before the leaves appear.

919. FORSYTHIA VIRIDISSIMA (Greenstem Forsythia)—Canes tall and erect.
Flowers rich yellow color with twisted petals.
Foliage dark, rich green. The earliest of
all shrubs to bloom.

o bloom, 920. HIBISCUS SYRIACUS (Shrub Althea)—Of the late summer blooming shrubs, there are none that equals the wealth of bloom or the grand array of colors afforded by the shrub aitheas. We have a large number of sorts, some with double flowers, some with single, in white, red, lavender, and purple. purple.

930. HYDRANGEA (Snowhill)

One of the showlest of summer blooming shrubs. Grows about four feet high, the canes terminated by a gigantic, flattened snowball.

tened snowball.

931. HYDRANGEA (Pee Gee)
—Becomes a tree-like bush,
often 10 feet tall. Branches
terminated in late summer by
immense panicles of snowballlike flowers, white at first,
turning bronze.

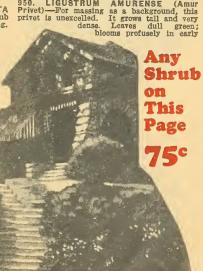

935. KERRIA JAPONICA,
(Kerria) (Corchorus)—A very
bright and cheerful shrub of
dwarf or medium growth. Its
numerous, slender green canes
are very attractive in winter.
Its flowers are of bright yellow
color, resembling half opened

rose buds.

940. LAGERSTROEMINA INDICA (Common Crape Myrtle)—Vigorous shrubs or small trees clothed with small, bright green, glossy leaves. The flowers, which appear in spring, are fringed and colored in different shades of white, scarlet and purple, and last for soveral days. Throughout the South, no other shrub is more satisfactory for general planting.

950. LIGUSTRUM AMURENSE (Amur Privet)—For massing as a background, this privet is unexcelled. It grows tall and very dense. Leaves dull green; blooms profusely in early rose huds

spring; flowers of lilac-like form, pure white. The hardiest of the privets. 951. LIGUSTRUM OVALIFOLIUM (California Privet)—Similar to the preceding but with larger, glossy leaves. Not reliably hardy North. 955. LONICERA FRAGRANTISSI-MA (Winter Honeysuckle)—A tall, sturdy bushy shrub with attractive, rich green leaves. Blossoms very fragrant; opening in early spring before the leaves.

rich green leaves. Blossoms very fragrant; opening in early spring before the leaves.

955. LONICERA MORROWI (Morrow Honeysuckie)—Tail, bushy shrub of neat, clean appearance. A mass of white bloom in spring, followed by bright red berries that hang on for several weeks.

957. LONICERA TATARICA (Tatarias Honeysuckie)—This tail grow-ling bush unfolds its leaves very early in the spring, affording a contrast with those shrubs that bloom ahead of the leaves. Its flowers are of pinkish hue, followed by red berries.

958. MAHONIA AQUIFOLIUM (Orogon Hollyberry)—Grows about four feet high. Leaves compound, each leaflet resembling that of the holly. Canes terminated by panicle of yellow flowers, followed by blue berries. Evergreen in this latitude.

960. PHILADELPHUS CORONARIUS (Sweet Mockorango)—Strong, eres shrub, very popular everywhere. The flowers are very profuse, resembling in size and color that of the strawberry, and in fragrance, that of the orange.

965. PRUNUS, PURPLELEAF PLUM (Prunus missardi)—A tail tree-like shrub clothed with leaves of deep reddish purple color. Distinctly ornamental.

966. PHYSOCARPUS OPULIFOLIUS, (Spirea opulifolia) Common Ninebark—Growth upright, attaining 8 to 10 feet, although the white, heavy flowered umbels in June make the branches droop. Seed pods turn dark red; very striking in appearance.

967. RHAMNUS CATHAETICUS (Common Buckthern)—A dense, twigsy bush 6 to 10 feet high, with dark foliage relieved by masses of attractive white flowers in midsummer. May be trimmed as a hedge, 968. RHUS CANADENSIS (Fragrant Sumae)—A low growing, native shrub having slender canes; foliage leafets sonewhat like that of 2 gooseberry. Flowers terminal, yellow, in small panicle; followed by red reddies. Especially attractive: in autumn.

Anthony Waterer Spirea

970. RHUS GLABRA (Smooth Sumae)—Grows about 6 feet high. Splendid foliage all summer, becoming brilliantly colored in autumn.

971. RHUS TYPHINA (Staghern Sumae)—Sturdy grower, the branches covered with velvet like the new horns of a stag.

971. RHUS TYPHINA (Staghern Sumac)—Sturdy grower, the branches covered with velvet like the new horns of a stag.

974. SAMBUCUS CANADENSIS (American Elder)—This is the native elder of the wastelands. Beautiful when in flower, and much appreciated for its immense production of black, edible berries. 975. AMERICAN GOLDEN ELDER—Similar in habit of growth, but having foliage of bright yellow color. 977. SPIREA THUNBERGI (Thunberg spirea)—Dwarf shrub with very slender twigs and dainty foliage. Flowers white in early graphs.

early spring.

978. ANTHONY WATERER SPIREA—Low growing shrub with erect canes, each terminated by a flat topped cluster of pink

flowers. 979.

flowers.

979. BILLARD SPIREA—Erect, becoming 6 feet tail. Flower clusters in panicle, bright pink.

980. VAN HOUTTE SPIREA—The most popular of all flowering shrubs, because of its great wealth of pure white flowers in spring.

985. SYMPHORICARPUS RACEMOSUS (Common Snewberry)—Inconspicuous rose colored flowers in June, followed by large clusters of milk-white fruits which remain far into the winter.

986. SYMPHORICARPUS VULGARIS (Coralberry)—Similar to the above, but with fruits of bright red color.

987. SYRINGA CHINENSIS (Chinese Lilac)—Grows To to 12 feet high; immense reddish purple panicles in late spring.

988. PERSIAN PURPLE LILAC—Medium grower, with slender leaves and bearing a profusion of purple flowers.

990. PERSIAN WHITE LILAC—The

990. PERSIAN WHITE LILAC-The same, but with white flowers.

992. VIBURNUM DENTATUM (Arrow-wood)—A beautiful shrub with bright green, heart shaped leaves, turning to purple and red in autumn. Flowers in flat topped cluster clusters, creamy white, followed by

place perries.

994. COMMON SNOWBALL.—This popular thrub is too well known to need a description. Conspicuous in early spring because of its snow white balls of blossoms.

995. JAPANESE SNOWBALL—Flowers similar to the common snowball; leaves wrinkled and fuzzy.

996. WEIGELA ROSEA (Pink Weigeja)
—Tall, sturdy shrub, hearing a profusion of pink, trumpet-shaped blossoms in late spring.

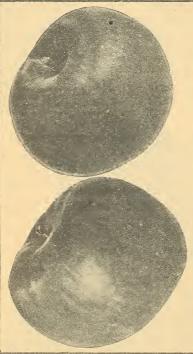

997. EVA RATHKE WEIGELA—More dwarf in habit than the preceding. Flowers dark red. Late bloomer.

Van Houtte Spirea

## Plant a Garden of Hardy Flowers

For the beautification of the home grounds and for the supply of an abundance of lovely flowers for cutting there are none that have made such rapid cutting there are none that have made such rapid strides into public favor as the Old Fashioned Hardy Garden Flowers. These afford the greatest range of colors and an abundance of sweet perfume throughout the entire summer. Every day in the Hardy Garden brings forth something new to interest and delight even the most critical, from the time the snow leaves the ground in spring until late fall when only hard freezing weather will stop such persistent bloomers as the hardy chrysanthemums, torchillies, etc. mums, torchillies, etc. Your landscape planting is not complete without a

generous grouping of hardy perennials such as are listed below. While some kinds may be planted in the foreground of the shrub border, a better display will be had, and the plants will bloom more profusely if they are planted in a gradual or border. profusely if they are planted in a garden or border all by themselves. The following list contains only the popular, hardy sorts that are so very useful and

so well liked everywhere.

## This Spring plant a Garden of

## Hardy Flowers

#### Delphinium Larkspur

367A. Belladonna—A free and continuous bloomer with beautiful, light blue flowers in long, loose spikes. An old favorite.

Sellamesa—This charming plant
is a tall grower, producing splkes 3 feet
or more tall. The flowers are of deep
blue with lighter center.

368. Gloxinia Flowered—The tall spikes of this plant are very lovely, and bear a profusion of thimble-like flowers of various shades of color.

#### Gaillardia Gaillardia

369. GAILLARDIA ARISDATA (Common Perennial Gaillardia)—A very showy bloomer, beginning to flower in July and continuing until frost. Flowers gorgeously colored with center of brown and petals marked with rings of crimson and

#### Hibiscus Rosemallow

370. Marvel—A very sturdy perennial, producing strong canes 6 feet tall and bearing in the axils of the leaves great saucer-liker flowers often 8 inches across. Colors range from white to deep red.

#### Hosta Plantainlily

376. H. caerulea (Blue plantainily) (Funkia)—A favorite edging plant and among the easiest of all perennials to manage. Thrives in sun or shade and produces large numbers of flowers of deep the call of the call blue colors on spikes well above the 378A. H. plantaginea (White Plantain-lily) (Funkia subcordata)—Similar in abit to the preceding, but with large, heart-shaped leaves and white flowers.

#### Iris Iris

The Iris Iris

The Iris is one of the most desirable and most popular of the early flowering personnials. The flowers possess a grace of form that is equaled in beauty only by some of the rarest orchids, and a perfume of delightful sweetness. We offer the following excellent varieties:

15¢
380. Dalmatica (Pallida dalmatica)—One of the finest of the type, strong, vigorous habit, growing often to 4 feet high, with exceptionally fragrant, large flowers. Standards lavender; falls shaded with blue. Exquisite in every way.

380A. Florentina—An old favorite, producing a profusion of pure white flowers.

380B. Honorabile—Standards golden yellow, falls rich mahogany brown color.

380C. Mme. Chereau—Flowers of clear white color, handsomely feathered and bordered with blue. Edge way.

380D. Mrs. Horace Darwin—Standards white; falls veined with violet.

385. IRIS KAEMPFERI (Japanese Iris)—This lovely iris produces flowers of huge size and of marvelous richness of coloring and form. They come at a time when attractive flowers are particularly welcome. We have some choice varieties. Per doz., \$1.00; each. 15¢

#### Kniphofia Torchlily

389. Bonfre Torchilly (Tritoma pfitzeri)

—This is one of the grandest of the torchillies, producing flowering stems 4 feet high, bearing great heads of bloom a foot long, of rich orange-scarlet color, shading to salmon-rose on the edge. 25¢ Per doz., \$2.50; each...

#### Paeonia Peony

Paconia Peonia Peony

Peonies are the most valuable and most beloved of all perennial plants. They give a grand display of majestic blossoms, rivaling the rose in grandour of form, coloring and fragrance, and of nuch greater size. A favorite flower for memorial day. When once planted will endure for years, growing better with age. We offer the following grand varieties: 390A. Festiva maxima—Beautiful large, double white, with frilled petals and a bright cherry red spot in the center, borne on tall, stiff stems. This is the 50¢ 390B. Queen Victoria—Fresh color fad-390B. Queen Victoria—Flesh color fading to pure white. Very free 50¢ 390C. Edulis superba—Bright mauve pink flowers of large size on stiff stems, Very fragrant; free bloomer. One 50¢ 390D. Golden Harvest—Deep rose pink petals with creamy gold center. A much admired variety. Each 30¢ 390E. La Tulipe—Flowers delicate rose, fading to creamy white. This is 50¢ an extra fine peony. Each 390G. Fellx Crousse—Deep ruby red. Very choice. Each 80¢

#### Phlox Phlox

For mid-summer bloom few plants can compare in galety of colors with the hardy phlox. It is the showlest of all, and sure to bloom. We offer the following excellent varieties:

395A. Miss Lingard—A very fine pure white flower, beginning to bloom in June and continuing all summer.

395B. Bridesmald—Pure white with large crimson eye.

395C. Elizabeth Campbell—Bright salmon pink with dark crimson eye. mon pink with dark crimson eye.
396D. Rheinlander — Beautiful salmon 397E. Rijnstroom (Rynstrom) - Bright carmine rose of great beauty.

#### Physalis Groundcherry or Lantern Plant

359. P. franchetl (Lantern Groundcherry)

—An interesting perennial producing small white flowers followed by green lantern-like pods which, in autumn, turn to a brilliant red. If the stems are cut, the pods dry and hold their color growths.

Physostegia False-dragonhead 396. P. virginiana (Virginia False-dragonhead)—One of the most showy of mid-summer flowering plants, forming dense bushes 4 to 6 feet tall, bearing spikes of delicate pinkish-lavender flowers not unlike giant heather.

## GLADIOLI FOR GARDEN GLORY

Gladioli are beautiful, they are grand. They are truly the flower for the millions and the millionaire. Every flower garden, no matter how small will glow with gladness when Gladioli are used. These lovely flowers are well fitted for all purposes, and make attractive displays either planted in masses or set in bunches of three or four among the perennials and annuals. As cut flowers, they last remarkably long in water, and develop perfect flowers from every bud on the spike.

water, and develop perfect flowers from eve water, and develop perfect flowers from eve 149.

349. AMERICA—A beautiful lavender pink. The flowers are of largest size and are borne on strong spikes 2 to 3 feet long. The spike is closely set with the beautiful blooms, which all face one way. This is a most popular variety for the garden and for cutting.

350. PEACE—Beautiful white flowers with pale Illac penciling on the two lower petals. An exceptionally fine flower.

351. WAR—Deep blood-red, shaded crimson-black; very tall and conspicuous. This is probably the best Gladiolus of this beautiful shade of red.

352. NIAGARA—A light crocus or primrose yellow, slightly tinted with rose pink in the throat; large, open flower on a strong spike. For color, texture and keeping qualities this is one of the very best varieties.

353. MRS. FRANK PENDLETON—One of the most exquisitely colored and formed Gladiolus in our entire lot. In addition, the size of bloom is not exceeded by any other. The color is a delicately flushed salmon pink, with a rich maron blotch on the three lower petals.

355. MARY FENNELL—Produces a wide open flower of deep lilac or light

lavender, with a creamy yellow throat, the lower petals being penciled with yellow. A beautiful combination of colors, and a

A beautiful combination of colors, and a handsome flower.

355A. GRETCHEN ZANG—Soft shade of pink, blending into scarlet on lower petals. Spike tail and graceful.

355B. LE MARECHAL FOCH—Flowers of soft, delicate pink, a shade brighter than America; quite a number open at once. It is one of the earliest to bloom, and the flowers are of huge size.

354. PRINCEPS—Large amarillis-like flowers of a rich, dark scarlet, with deep shadings in the throat and magnificent large white blotches on the lower petals.

#### Large Bulbs 10c Each; \$1.00 per dozen, Postpaid Except Where Noted.

356. SUPERB MIXTURE—Our Mixed Gladioli are made up from a very large number of the finest of named varieties and contain every conceivable color. We especially recommend this mixture to those who wish the largest range of coloring. Per dozen 65¢

Offer No. 1503

It would be impossible to exaggerate the beauty of the rose. The very name suggests beauty and fragrance. It is the flower we love the best and deserves all the affection and care we bestow upon it. To have roses all summer is now a possibility, even with but a small garden. Our list comprises reliable, hardy varieties, producing a large range of colors, which will bloom from spring till November. It is a question of careful selection and we will gladly assist you. Our roses are strong, field grown plants, produced under the most favorable of growing conditions and are certain to bloom freely. Roses for outdoor growing should be planted in a rich, well drained soil with full exposure to the sun. Roses do not bloom well when planted in shady places. Teas and Hybrid Teas should be set about 18 inches apart and the Hybrid Perpetuals two feet or more apart. Do not put manure in direct contact with the roots. But after the plants are set, a liberal application of harnvard resource. small garden. Our list comprises reliable, hardy vari-

plants are set, a liberal applica-tion of barnyard manure makes a most excellent dressing. When planting roses cut off all of the

prematurely ripened and shriveled wood and small shoots, and cut back the longest and strongest shoots to 4 to 6 inches in length. When roses are treated in this manner they will grow and bloom all the better.

Doz. \$600

225. AMERICAN BEAUTY—Large, globular, pink shaded with carmine; delicious odor.

226. ANNA DE DIESBACK—This rose was introduced in 1858 and is well known. It is a beautiful shade of carmine-pink; flowers are large, full and very fragrant. On account of its hardiness it's a fine garden sort.

227. CAROLINE TESTOUT (The Oregon Rose)—A large rose, especially adapted for table decoration. Deep pink in color, beautiful buds.

228. FRAU KARL DRUSCHK!—Fure white; large long buds, perfect form. It is the best white Hybrid Perpetual known and one of the best novelties of recent years. Will grow wherever other roses can be grown.

229. GRUSS AN TEPLITZ—Beautiful crimson red, wonderfully free-flowering. One of the finest for outside show.

230. GENERAL JACQUEMINOT—Bright crimson; large but not full, although very effective; hardy and fragrant. Famous the world over.

effective; hardy and Iragians, world over.

231. KAISERIN AUGUSTE VIKTORIA—red; very attreating to lemon. Flowers large, fine formed, borne singly on strong, upright stems; continues beautiful even when tilly expanded. The fragrance is distinct from other varieties, being a combination of tea and magnolia. Free-flowering and vigorous, with glossy foliage.

232. KILLARNEY—Noted for its freedom of bloom and the large size of its intensely fragrant flowers. Buds are large, long and pointed. Color flesh, shaded white, suffused hale pink.

the large size of its intensely large and white, suffused pale pink.

233. LA FRANCE—Probably the best known rose in cultivation. Both flowers and buds are of beautiful form and large size; very sweet; color delicate silvery rose, changing to silvery pink. Starts to bloom when very small and continues until stopped by frost.

234. MME. FRANCISCA KRUGER—Deep shade of copper-yellow flowers which bloom continuously. Excellent for bedding and massing.

235. MRS. JOHN LAING—Very free-flowering, commencing to bloom early in the season and continuing until autumn. Color a soft, delicate pink, with a satin tine; very fragrant.

236. MARGARET DICKSON—Magnificent form, white with large pale flesh center. Petals very large, well shaped and of great substance. Foliage very large, dark green. Fragrant. A fine variety.

237. MME. PLANTIER—Pure white, above medium size, produced in great abundance early in the season. One of the best hardy white roses, sometimes called the cemetery rose.

238. MME. GABRIEL LUIZET—Very distinct pink, large, cupshaped; fragrant. It has no rival as an exhibition rose.

239. MARSHALL P. WILLER—Cherry carmine, large size, good

very fragrant, form, ver bloomer vigorous grower; very valuable.

240. PAUL NEYRON—Deep red rose;
splendid foliage and
habit, with larger

splendid foliage and habit, with larger flowers than any other variety. Free bloomer. This rose produces its blossoms at the ends of the long, straight canes at straight canes that are almost entirely thornless. For outdoor planting, Paul Neyron is one of the best of roses, and always rewards with a grand supply of the loveliest of roses.

241. SALET (Moss)—Bright rosy red; a vigorous grower; an abundant bloomer, seldom surpassed; pretty in bud.

242. ULRICH BRUNNER—Bright cherry-red; very attractive; flowers of fine form carried well upon the plant; petals of great substance; plant hardy, vigorous and resists mildew.

### PLANT ROSES

For Memorials, Wedding Anniversaries, Birthdays, Etc.

Roses speak a universal language. When words fall utterly in con sying the tender messages of sympathy or congratulation, roses are the flower of flowers that full carry the words in ways that reach a tender in fullness and beauty. Use rose plants as gifts to friends, at the anniversaries of memorable events. Plant them in your own yard to commemorate happenings which are dear to your own experience, and where you can gather the lovely blossoms for your own enjoyment and pleasure. lovely blosso and pleasure.

and pleasure.

Hoses are truly the "Queen of Flowers."
And in spite of the wealth of bloom and beauty that is produced by the wonderful array of flowering shrubs and hardy perennials that we list in this catalog, none of them can compare in the soul-satisfying pleasure that is given by roses.

If you do not have room enough to have real rose garden, you surely have room on your window sill for a rose bush in a pot.

Each

## Four Grand Offer No. Monthly Roses

Teolitz Pink Radiance

## They Will **Bloom Abundantly** This Year

Remember, these plants are strong. two-year-old Field-Grown-big sturdy bushes, that get right down to business and bloom.

PINK RADIANCE-One of the most beautiful Hybrid Tea Roses grown. The flowers are large, beautifully formed in bud and opening into majestic blossoms of a dainty pink color, exquisitely perfumed. Hardy; free flowering; healthy.

ETOILE DE LYON-A golden yellow rose of magnificent coloring. This is one of the hardiest of the yellow

tea roses, and is admirably suited for garden planting. The plants are very strong growers, and produce in profusion flowers of excellent substance, rivaling the beauty of the well known Marechal Niel.

GRUSS AN TEPLITZ—Brilliant red in color, and one of the most astonishingly free bloomers of roses. It is constantly in bloom from early spring until freezing weather. The flowers are of large size, exquisite in gorgeous

coloring, totally unlike any other red rose. Incomparable in its sweet fragrance. Perfectly hardy everywhere.

KAISERIN AUGUSTE VIKTORIA—This is the grandest white Hybrid Tea rose in existence. It is a very strong, sturdy grower, needing an abundance of room. It has become the most popular of all white roses, because of the immensity of its blossoms, the continuous blooming from early spring until fall, and the perfection of opening buds and fully expanded flowers. This lovely rose is unexcelled for cutting, and is perfectly hardy everywhere. There is nothing finer among roses than this grand variety.

Crisp Vegetables For Your Own Garden Order This Big Assortment Today

Healthful; Nutritious; Necessary. Food experts, scientific investigators, dietitians are united in their acclaim that vegetables—lots of them—should be a part of the daily diet. In vegetables, Nature has put many properties, of vital importance in maintaining health, and which do not exist in foods of animal origin. Grow vegetables to eat, to can and to sell. Cut your food costs with garden crops. Plant a garden this year.

DWARF OR BUSH BEANS

Ask for Quantity Prices

CULTURE—Beans are tender, and should not be planted until all danger from frost is past.

No time is gained by planting them before the ground becomes warm. Drop the beans two or three inches apart, in rows standing eighteen inches or two feet apart; cultivate only when dry; draw the soil slightly toward them. They will make green beans in six to eight weeks; sow every two weeks for a succession, if seasonable, up to September.

Please write for prices in larger quantities than quoted below.

Please write for prices in larger quantities than quoted below.

403. BLACK VALENTINE—A great improvement over the old standard early Bed Valentine, being one-third longer, with pode perfectly round and straight and of excellent quality. It also has the additional advantage of being suitable for both early and late planting and is extremely hardy. It will withstand early and late frost, an excellent shipper, large yielder, and of very handsome large yielder, and of very handsome appearance. Postpaid; lb., 35c; pkt. 10¢

Not postpaid; 10 lbs., \$3.00.

404. BURPEE'S STRINGLESS GREEN POD—Surpasses all other bush beans in crisp, tender qualities and fine flavor. For the home garden one of the best in its class. The pods are round, of good size, strictly stringless, and continuous bearing for a long time. Matures 10¢

Not postpaid; 10 lbs., \$3.50.

## **Mangels or Stock Beets**

Ask for Quantity Prices

Mangels or Stock Beets are a splendid winter feed for cattle and hogs. Increases the milk yield from cows. Puts animals in better physical condition. Yield larger crops than turnips and are of greater feeding value. The best root food in existence for all kinds of livestock. Over forty tons have been grown on a single acre. No more profitable crop can be grown for stock and hog feed. Every farmer should plant one or two acres every year. No other acre on the farm would return better dividends. Under favorable conditions 40 tons per acre can be grown, and in feeding value this is equal to 130 bushels of corn. Boot food helps to keep stock in a healthy condition, besides affording a variety of feed.
All stock raisers and farmers should investigate the great food value of Mangels.
Try them and be convinced.

value of Mangels.

Try them and be convinced.

CULTURE—Much depends on good culture, so prepare your land
thoroughly and plow deeply. Sow from about the middle of March
until the middle of June, and give thorough cultivation. After
the first cultivation, thin out, so as to stand six inches spart in
the row, and cultivate like corn. If late in planting sock the
seeds for 24 hours before planting. Do not begin feeding Mangels
until after January first. Plant six pounds to the acre in rows

246 feet apart. until after Jan 21/2 feet apart.

-The largest of all Mangels The roofs grow about 1/2 and the heaviest cropper. The roots grow about 4 out of the ground and frequently measure two or more feet in length by six inches in diameter. An excellent keeper, nutritious and milk producing. Postpaid; lb., 60c; 4 lb., 20c; cz., 15c; nkt.

Not postpaid; 5 or 10 lbs, at 50c per pound.

423. WHITE FRENCH SUGAR—A strain of beets very desirable for stock feeding, affording not only a very large crop, but exceedingly rich in sugar and other nutritive elements, and is a much better beet for stock feeding than the small sugar beet. The roots average ten to twelve inches, and the outline is that of a broad, thick wedge. The upper portion is of a soft, bright pink, shading lighter toward the bottom, where the lower portion for about one-third the length is white. Postpaid; lb., 60c; 1/4 lb., 20c; oz., 15c; pkt. 56.

Not postpaid; 5 or 10 lbs. at 50c per pound.

Cabbage

CULTURE—Good drainage, plenty of manure on rich, heavy loam, and frequent cultivation are essential to success in cabbage-growing. For the early sorts sow the seeds in the fall and when the plants are a month old, transplant to cold-frames, setting them down to the first leaves. Sow also in January and February and dransplant 2 to 3 feet apart in the rows, according to variety planted. For late variety, sow from the middle to the last of spring and transplant when 4 to 6 inches high.

425. ALL SEASONS—One of the best of its class. Ready for the market only a few days later than the Early Summer and is much larger. The heads are firm, solld, and of good flavor. Postpaid; ib., \$2.50; ½ ib., 750; cz.,

25c; pkt.

426. CHARLESTON OR LARGE WAKEFIELD
—Splendid strain of Jersey Wakefield, about a
week later, with heads twice as large, weighing
from 8 to 12 pounds each and more, and not so
pointed as the original Charleston Wakefield;
is a good keeper and may be planted as a second
crop, to mature in autumn, if desired. Much
used by market gardeners to follow Jersey Wakefield; a first rate
shipper, and in great favor with everybody who knows it.

10¢
427. COPENHAGEN MARKET—The heads are nearly round or

Postpaid; ib., \$2.50; ¼ ib., 75c; oz., 25c; pkt.

427. COPENHAGEN MARKET—The heads are nearly round or slightly flattened, very hard and heavy. The growth is compact, there being few outside leaves, so the plants may be set close together. Copenhagen Market heads as soon as Jersey Wakefield cabbage. The most remarkable point about this cabbage is its uniformity—very plant under normal conditions will produce a good, solid head, and every head is as like another as two peas in a pod. The heads mature all at the same time so the crop can be cleaned up within a short time after the first heads mature. A very profitable cabbage to grow for market and an excellent variety for the home garden.

Postpaid; ib., \$2.75; ¼ ib., \$5c; oz., 30c; pkt.

10¢

10¢ Postpaid; ib., \$2.50; 1/4 lb., 750; oz., 250; pkt ....

430. EARLY JERSEY WAKEFIELD—Market gardeners can find nothing better for an early cabbage. Heads somewhat pointed, extremely solid, superior quality.

Postpaid; ib., \$2.50; ½ ib., 750; oz., 250; pkt. 10¢

431. LARGE LATE DRUMHEAD—A standard fall shipping

431. LARGE LATE DRUWHEAD—A standard fall shipping sort. Makes a large, round, firm head, uniform in shape and color, which seldom bursts or rots. With good cultivation heads attain a weight of 20 to 30 pout is, and are of the finest quality. Sureness in heading and regularity in growth has made this one of the most popular sorts for winter keeping. The quality, either for slicing, for kraut or for general table use is unsurpassed.

10¢

A32. DRUMHEAD SAVOY—Best and largest heading of the Savoy Cabbage. Few people seem to know the delicious flavor of Savoy Cabbage. Far superior to the flat-leaved sorts, and as tender as calliflower, after frost. Should be in every garden.

10¢

433. LATE FLAT DUTCH—Grows to large size; flat, solid heads; a sure header, good keeper and shipper.

10¢

244. NAMANTAL FLAT DEED ROCK—Largest page 10¢

25c. pkt. 10¢

434. MAMMOTH RED ROCK—Largest and surest heading red cabbage. Plants are large with numerous spreading leaves. Head is large, round, very solid, and of a deep red color. Ninety-eight per cent of the plants will form extra fine heads. Postpaid; 10¢ lb., \$2.50; ¼ lb., 750; oz., 25c; pkt.

coast.

## Frost Proof Cabbage Plants

Our Frost Proof Cabbage Plants are tough, hardy, and mature from three to five weeks earlier than hotbed grown plants. They are cheaper to buy, easier to grow and more certain to head satisfactorily than plants of your own growing. Our plants are all produced from select strains of seed in the open field

on the Gulf Coast. They are sturdy, husky and when planted in your garden, will survive a hard frost with no damage whatever. You can plant them fully three weeks ahead of home-grown plants, and have mature cabbages just that much earlier. They are the ideal plants for market gardeners to use.

## Make Money Raising Horseradish

There are few vegetable crops that will make money for you any faster than Horse-radish! Profits running into very large figures are easily possible. Some of our customers are making more than \$1,000 an acre from horseradish and are hardly able to keep up with the demand for this delicious condiment. There is an active market for horseradish near every good size town or city. If you are looking for some crop that you can grow on a small acreage and make big money from it, we suggest that you try horseradish, and especially so if you live near a large city. The roots are always salable on wholesale produce markets and to grocery stores. But the largest profits come when the roots are washed clean, grated, mixed with vinegar and sold to grocery stores, butcher shops and restaurants. Then you get the best profits. Our book "Horseradish Profits" tells just how to grow the crop and how to make money out of it by grating and bettling for a high class trade. With the instructions given in this little book, you can increase your knoome. In fact, many persons have built up a good and profitable business by growing and selling horsehadish as indicated in this little book. A copy of this book is sent free, as indicated in the offer below.

Plant It For Quick Profits

146. MONEYMAKER HORSERADISH—A new variety that is proving to be a veritable gold mine to market gardeners. It produces large roots very quickly; grates into a pulp of splendid texture and excellent pungency. Because of its quick maturity, growers can get Moneymaker onto the market when the prices are best. Plants, 10c each; \$1.00 per dozen;

Chinese Cabbage

#### Chinese Cabbage

CARMESE CADDAGE
435. CHINESE or CELERY
CABBAGE—A new vegetable
from China that is attracting
much attention. By tring up
the large outer leaves it
blanches like celery. As a
salad it rivals the finest lettuce, or cooked like cabbage
or spinach, it makes splendid
greens. For main crop sow
the seed last of August, and
transplant a foot apart when
large enough. Pestpaid; lb.,
\$2.50; //4 lb., 756;
oz., 25c; pkt. 10¢

#### COLLARD

A plant bearing a large mass of leaves on the top of a stout stalk. A species of cab-bage, and the flavor is the same. It bears leaves all through the winter, and is used Young plants may be started in boxes in early spring, and the young plants trans-planted, allowing plenty of room for each plant. Set 14x18 inches.

437. TRUE GEORGIA—Grows from 4 to 5 feet high, and forms a very large, loose head. Leaves are tinged with purple. Postpaid; ib. \$1.75; 1/4 lb., 500;

#### CARROTS

CULTURE—For early crops sow in spring, as soon as ground can be worked, in drills 15 inches apart; cover seed one-half inch; thin plants to three or four inches in rows.

40c; oz., 15c; pkt.\_\_

438. DANVERS' HALF LONG—A rich orange red variety, very smooth and handvariety, very smooth and name some. An excellent market variety. The most desirable main crop variety. Good keeper. Postpaid; lb., \$1.20; 1/4 lb., 400; oz., 150; 5¢

439. GUERANDE, or OX-HEART—A good variety on solls too hard and stiff for the longer-growing sorts.

Oxheart Root is short, very thick, and has a small tap-root; flesh bright orange color, fine grained and sweet flavor. Postpadid; lb., \$1.20; ½ lb., \$400; oz., 150; pkt.

440. LONG ORANGE—Best late variety for general field culture. It keeps very well, and is therefore excellently adapted for winter use. Postpaid; lb., \$1.20; 1/4 lb., 40c; oz., 15c; pkt. Ib., 40c; oz., 15c; pkt...

#### CAULIFLOWER

Although noe of the most delicious vegetables, is but little grown except by professional gardeners, because of the erroneous notion that it is so difficult to grow that only skilled gardeners can produce it. Anyone will be reasonably certain of success with this most desirable vegetable. Can be grown in the South as easily as Cabbage. All they need is rich soil and plenty of water. Planted both in the spring and in the spring and in the spring and in the south as they are hard.

442. EARLY DWARF ERFIRE

442. EARLY DWARF ERFURT—A remarkably sure heading Cauliflower. Of dwarf habit with short outside leaves. The heads when ready for market are of medium to large size, curd white; deep and of finest quality. Gives excellent results for either home garden or market.

Postpaid: 1/2 oz., 650; pkt.

443. EARLY SNOWBALL — Undoubtedly the finest variety ever introduced. Produces beautiful snow-white heads of finest flavor. Postpaid; 1/4 oz., 650; pkt... 20¢

#### CELERY

Celery seed is slow to germinate and ample time must be given. Sow thinly, cover

Sow thinly, con-lightly and keep con-moist. Count stantly moist. Count on about 7,500 plants on about 7,500 plants per ounce, or ½ pound per acre. When the seedling plants are 3 inches high, clip for stocky growth, or else transplant.

444. G O L D E N
SELF-BLANCHING,
or PARIS GOLDEN
—The best market variety,
especially for early crop. The
plant is naturally golden yel-

plant is naturally golden yellow (both stem and leaves), but needs to be blanched to make it brittle and fit for table; rather small bunch. French grown. Postpaid; ez., 85c; ½ ez., 60c; 10¢ White Plume pkt.

445. WHITE PLUME-A comparatively easy variety to grow, as it is fairly hardy, and being naturally white, is easy to blanch. The leaves are also white, tinged with green at tips. Forms a medium size bunch, fairly tall: early. Postpaid; oz., 25e; ½ oz., 15c; pkt.  $10\phi$ 

#### CELERIAC

446. Produces a tuber somewhat like a turnip and top like celery. It is largely grown for the purpose of flavoring soups. Postpaid; 1/4 lb., 80c; cz., 25c; 10¢

#### SWEET CORN

CULTURE-Plant in hills 3 feet apart: leave 2 or 3 plants to the hill where ground

PEG—A well-known medium-early sort. Very productive. Market gardeners who supply hotels and high-class restaurants depend on this for main crop. Postsaid; 10¢ 1.35; lb., 350; pkt.

Golden Bantam

448. EARLY ADAMS—While not a sweet corn is usually classed with them. The ears are well filled. It can be planted earlier than sweet corn. The stalks grow about 6 feet high on good land, bearing 2 or 3 medium size ears of white grains of excellent quality. A very popular reasting ear corn. Postpaid; 5 lbs., \$1.25; lb., 300; 10¢

449. GOLDEN BANTAM—A very sweet corn with golden-yellow grains. Generally considered the sweetest and tenderest variety in existence. Probably more extensively grown than any other early variety. Ears 6 to 7 inches long. Postpaid; 10¢

MAMMOTH WHITE CORY-One of largest and best extra early sweet corns. Each stalk furnishes two or more large, fineshaped ears. The ears are twelve-rowed. very symmetrical and handsome. The grain is large, broad, very white and of remarkis large, broad, very white and early sort, ably good quality for such an early sort, Postpaid; 5 lbs., \$1.25; lb., \$00;  $10\phi$

#### CANTALOUPES

Ask for Quantity Prices

Ask for Quantity Prices

CULTURE—The soil for Cantaloupes must
be light, rich and sandy for if grown on a
heavy soil the quality will be poor and
they will not be so early. When danger of
frost is over drop 8 or 10 seeds in a hill,
6 feet apart each way, covering about 1
inch deep. As soon as they commence to
run thin out to 3 or 4 best plants in a hill,
and cultivate until the vines cover the
Ground. The seed can also be planted in
drills, and when plants are large enough
thin out to about 2 feet in the row. If
slow to fruit, pinch off the ends of the
growing shoots. The best way to prepare
the grounds for cantaloupes is to list the
swo 6 feet apart opening up a furrow
and putting barnyard manure in the furtown, then cover up. This should be done
t least 30 days before the seed is planted
so as to give the manure time to rot in
the ground.

#### KOHLRABI

EARLY WHITE VIENNA— called "Turnip-Booted Cabbage," large turnip-like bulbs on the above the ground. Should be used young and nutritious. Culture 476. EARLY WHILE VIENNA-Also called "Turnip-Booted Cabbage."
Forms large turnip-like bulbs on the stem above the ground. Should be used while young and nutritious. Culture same as for early cabbage. Very much sweeter than turnips. Pustpaid; 1/4 lb., 60c; cz., 20c; pkt.—54

#### LETTUCE

CULTURE—Lettuce thrives best in light, very rich, moist soil, but does well in common garden soil enriched with rotten manure. For first crop sow in gentle heat in February, and transplant to ten inches apart. May be sown thickly and cut when plants are very young. For a summer supply sow thinly in shallow drills in a cool, partially shaded place, in rich soil, and thin to a foot apart.

480. Big Boston—One of the most popular of the old standard varieties; desirable for forcing. Especially valuable for early outdoor planting or for late fall planting as it will endure cold weather conditions better than any other variety. Large compact heads of light green leaves, tender and crisp. Postpaid; lb., \$2.50; pkt.

481. BLACK SEEDED SIMPSON—A superior variety; large,

481. BLACK SEEDED SIMPSON-A superior variety; large, light colored heads. 50 Postpaid; Ib., \$1.30; 1/4 Ib., 400; oz., 150; pkt.

EARLY CURLED SIMPSON--Early; forms a compact of tender leaves of a yellowish green color.
Postpald; ib., \$2.00; ¼ ib., 60c; oz., 20c; pkt. 10¢

484. IMPROVED HANSON—In table quality the Hanson is perfection itself, being free from bitter taste. Forms immense, tender, crisp heads that remain long in good table condition. The outer leaves are large and broad, blistered and crumpled with frilled edges. Probably more largely grown than any other variety. Postpaid; ib., \$2.25; 1/4 lb., 600; oz., 200; pkt. 10¢

Grand Rapids

15c; pkt....

486. PRIZE HEAD - Plant Harge, deep green, so washed with red as often to appear more red than green, forming a head of a dense mass of leaves rather than one like a cabbace. Postpaid; lb., \$2.25; 1/4 10¢

486-A. GRAND RAPIDS—Especially adapted for greenhouse culture, being the best variety of its kind for this be grown outdoors early in the spring or late fall.

Makes a large compact bunch of curied and fringed leaves. Grows very fast and keeps for a long time after being out.

Pestpaid; lb., \$2.50; ½ lb., 75c; ez., 25c; pkt.

#### CORN SALAD

#### LEEK

MUSTARD 503. LARGE SMOOTH LEAVED—Has a large, fleshy leaf. The flavor is mild and it is quite slow in sending up its seed stalk, remaining a long time fit for table use. Postpaid; ib., \$1.00; 1/4 lb., 350; 02., 100; 54 GIANT CURLED—
Highly esteemed for salads, particularly in the
South. Leaves are twice the size of the
ordinary white mustard; flavor sweet
and pungent. Postpald; ib., 10¢ and pungent. Postpaid; ib., 10¢ 

488. This mixture is far better than straight Blue Grass. It is made other grasses that will grow rapidly and make a fine showing immediately, it gets well established. It is made up mostly of Blue Grass and White Clover and some mmediately. The coarser grasses will protect the Blue Grass until

The Kentucky Blue Grass and White Clover will eventually drive out the other grasses and make a fine lawn. This mixture is as good as we can make it and we have had a number of years' experience with grass seeds. Full directions for making and care of lawn on each package. Sow one pound to 150 square feet. Fut up in neat colored cartons and in bulk.

CULTURE—When the ground has become warm, sow thickly in drills 2 feet apart, and when large enough, thin out to 8 inches apart in the rows.

notes apart in the rows.

506. MAMMOTH LONG POD—Plant of medium height, producing beautiful long, slender, deep green pods, which remain tender a long time. Postpaid; ib., 650; 1/4 lb., 250; oz., 100; pkt. 5¢

507. WHITE VELVET—Plant of medium height, bearing a large crop, of white smooth pods, which retain their tenderness until nearly full stzed. Postpaid; lb., 650; ¼ lb., 250; cz., 100; pkt. 5¢

### **USE BERMUDA ONION PLANTS**

517. BERMUDA ONION PLANTS—The Bermuda Onion has made Texas famous. Train loads of this superior onion have been shipped from Texas every year. Planted extensively in the South for home use and for market and brings the highest price on all markets. Can be grown successfully wherever sets are grown. By setting out our plants early as you do sets you can have onlons quicker and at lower cost than from zets. The plants make much better enions as the sets have to rot before making into onions requiring much longer time to mature and is not nearly so large after spending its str gith in rotting.

The lants we are offering are the Crystal White Bermuda, the sweetest of all Bermuda variaties.

Postpaid; per 1,000, \$3.50; 200 up to 1,000, 400 per 100;

Ask for Quantity Prices
sets. Seed sown in early spring produces ripe onlons in the fall,
while sets planted at the same time make green "bunching" onlons
in a few weeks and dry ripe onlons in July or earlier. Sets may
be put out in the fall and will produce green onlons much earlier
than when set out in the spring. To raise good onlons from seed
the land must be rich and in fine condition. Sow the seed as
early as possible in rows 14 inches apart. Weed as soon as the
onlons appear and keep well cultivated all through the season.
Seed may also be sown in a hot bed or greenhouse in February
or March and the onlons transplanted to the open ground when
warm enough. The finest onlons are;
raised in this way.

508. IMPROVED YELLOW CLAUSE.

raised in this way.

508. IMPROVED YELLOW GIANT—Succeeds everywhere, whether grown for home use or marketing it gives universal satisfaction, yielding onions often 14 inches around.

Easily grown. Postpald; lb., \$2.25; 1/4 lb., 65c; cz., 25c; 1/2 10¢ ez., 15c; pkt.\_\_

509. LARGE RED GLOBE—Modium early; grows to a large size skin deep red, flesh fine grained, mild and tender. Postpaid; lb., \$2.25; ¼ lb., \$50; oz., \$250; 10¢

Large Red Wethersfield

510. LARGE RED WETHERSFIELD—The old standard sort; best for main crop. Large deep red, thick, nearly round, fine grained, pleasant flavored and productive. Ripens in September and keeps well. Postpald; ib., \$2.25; ¼ ib., 65c; 10¢.

511. PRIZETAKER—The Prizetaker Onion has proved itself to be the greatest acquisition in years, and is by far the handsomest, most productive and largest of all yellow globe onions. Always grows to a uniform shape, which is a perfect globe; has a very small neck and ripens up without stiffness of the neck. In market it never falls to attract attention on account of its immense size and its beauty, and is sure to bring a far better price than any other onion. It is even more attractive in appearance than the large Spanish Onions sold on the city fruit stands; in fact, it takes the place of that variety. Postpaid; ib., \$2.25; 10¢

512. WHITE SILVER SKIN—Matures early; rather flat in shape, mild flavor; excellent for winter; very much esteemed for pickling when small. Postpaid; ib., \$2.50; 1/4 lb., 70e; ez., 30c; 1/2 ez., 15c; pkt\_\_\_

Bed and yellow 60 cents gallon, P. P. White 70 cents gallon, P. P.

#### BERMUDA ONIONS

Bermuda onions are largely grown in the South and have been there a most profitable investment. They are planted there in the fall and shipped North in May and are the earliest large new onions on the market. Growers do equally well with them in the North. They are the quickest growing onions known, sown at the same time as Silver Skin they will produce fully grown bulbs, about 3 inches in diameter, when the others are only 1 inch large. The seed we offer are genuine Teneriffe grown.

white Bermuda.—The bulbs are quite broad and flat
m. The color is not a clear white but rather a pale straw;
crisp, solid and mild. Early ripening. Pestpaid;
10¢ flesh crisp, solid and mild. Early ripening the strain of the strain of

Prizetaker

515. RED BERMUDA—Similar in form and early ripening to the Bermuda White but grow larger in size, ranging from 8 to 4 inches in diameter. Very flat and of a light pink cotor. The flesh is white, slightly suffused with pink; very mild. Postpaid; 1/4 lb., \$1.25; ez., 60e; 10¢

72 02., 550; ptt.

516. CRYSTAL WHITE WAX—This new variety is a large, pure white flat onion. The earliest and most popular onion with the large growers in the South. Produces the mildest and sweetest onions of them all very fine for slicing, the color being so clear and pure. Postpaid; 1/4 lb., 10¢ \$1.25; 02., 650; 1/2 02., 350; ptt. 10¢

PARSLEY

Parsley is used as a garnishment for meats and salads and also adds a pleasing flavor to soups. Soak seed for several hours previous to sowing in warm, hot water, which will facilitate germination. Leave soaking for about 6 hours. Sow in border or frame. Thin rows to 8 inches each way. Use one ounce of seed to 150 feet of drill.

516. DOUBLE CURLED—Standard variety, curied leaves, finest quality. Postpald; lb., 900; ½ lb., 300; oz., 150; pkt.

PARSNIPS

CULTURE—Sow in early spring, in rows 2 to 3 feet apart; thin to 4 to 6 inches in the row. A packet will sow about 40 feet of drill, an ounce about 200 feet, 4 to 5 pounds per acre in drills 2½ feet apart. Cover the seed ½ inch. Beady to use in about 80 days or may be stored in the cellar for winter use or left in the ground all winter and dug when weather permits, or leave in the ground for spring use.

512. HOLLOW GROWN—Best for table use; a vegetable of merit easily raised and of great productiveness.

Postpaid; ¼ lb., 500; oz., 15e; pkt.

PEAS

Ask for Quantity Prices

CULTURE—Sow in earliest spring and make successive plantings every ten days until June 1. In the latter part of August sow early peas for an autumn crop. Drill 1 to 2 inches deep in rows 2½ to 4 feet apart. In the field use no sticks. In garden culture sow in double rows 10 inches apart, and use supports for the tall growing varieties.

525. EXTRA EARLY ALASKA—Of remarkable earliness and hardness. A good yielder and produces pods of good size and dark green color, which are well filled with round smooth peas of splendid 10¢ flavor. Postpaid; 10 lbs., \$3.50; lb., 40c, pkt. 10¢ well filled with the filter of the filter of

527. FIRST OF ALL—A reliable early cropper of the hardy smooth seed and variety. Not quite as early as Alaska, but great improvement over its parent, old Philadelphia. Postpaid; 10 lbs., \$2.50; 7 1 1 10¢ Ib., 350; pkt.....

528. NOTT'S EXCELSIOR—A dwarf variety and a good one. The vines are more vigorous than American Wonder, growing 12 to 15 inches in height; is very desirable as a second planting. Postpald; 10¢ 10 lbs., \$3.25; lb., 350; pkt.

529. TELEPHONE—A vigorous grower; extra large, well filled pods. Postpaid; 10 lbs., \$3.25; 10¢ lb., 35e; pkt.\_\_

7530, WHITE MARROWFAT—Grows 4 to 5 feet in height. Pods large, round, light green and well filled. Excellent 10¢ for summer crop. Postpaid; 10 ibs., \$3.00; ib., 35c; pkt. 10¢

FINE CONDITION

I received the 12 fruit trees last week, and I want to say
I never received any in any bettar condition.—J. N. Hodgin, North Carolina.

SURPRISED AND PLEASED
I received the 10 trees which I ordered on the special coupon, and was very much surprised and pleased with the fine varieties and nice stock.—E. Patten, Illinois.

HAD GOOD ROOTS
We received our trees and are well pleased with them.
They certainly had fine roots, and were in good shape
when received.—C. K. Jenkins, Kansas.

ORDER THIS COLLECTION TODAY

#### **PEPPERS**

CULTURE—Sow in early spring in a hotbed in shallow drills 6 inches apart. In order to make strong, healthy plants, they should be transplanted when a few inches high into another bed. For later plants, drill the seeds in a warm place in the garden about the middle of spring, and transplant the seedlings when 2 inches high. Set the plants in rows about 18 inches apart and a feot apart in the rows. The pepper delights in a rich, warm soil, and should be well cultivated. Postpaid; 1/4 lb., \$1.50; oz., 500; 10¢

532. NEW CHINESE GIANT—The largest mild pepper. On account of its earliness, productiveness and large size, truckers have found this a most profitale variety. Flesh unusually thick, mild and sweet. Postpaid; 1/4 fb., \$1.50; 10¢ oz., 50c; pkt.\_

Chinese Giant

Plmento

533. SWEET BELL, or BULLNOSE—A very large pepper of square shape, mild, thick and hard. Suitable for stuffing and for mixing pickles. Less pungent than other sorts, and notwithstanding its size, one of the earliest. Postpaid; 1/4 lb., \$1.50; oz., 50c; 10¢

pkt.

534. PIMENTO PEPPER—This is a sweet
pepper—that is the difference—one which you
will enjoy eating in salad, either fresh or
canned. Canners and market gardeners are
planting Pimento largely. Very thick flesh,
wonderful mild flavor. Postpaid; 1/4 lb., 10¢ \$1.75; oz., 50e; pkt....

#### PUMPKINS

Pumpkins can be easily grown among a crop of sweet or field corn, or wherever there is room for the vines to spread. In the small garden they can be grown along the fence row where the vines can climb over the fence without interfering with other crops. The hills should not be closer than 10 feet apart to give the vines rooms to spread. The fruits should be cut from the vine, leaving the stems attached to the fruit. Store them in a warm, dry place. One ounce of seed will plant 25 to 50 hills according to the size of the seed.

or the seed.

520. KENTUCKY FIELD—Large round, flattened; hardy and productive. One to two feet in diameter. It has thick flesh of extra fine quality and is a splendid sort for canning, family and market use, and is used largely for stock feeding. Postpaid; lb., 75c; 5¢, 4, 10., 25c; cz., 10c; pkt. 5¢

LARGE CHEESE -- Best for canning; has heavy, thick, sweet meat; large round flattened variety, with creamy-buff skin. An excellent keeper and very productive; good quality. Postpaid; lb., 75c; 1/4 lb., 25c; oz., 10e; pkt. 5¢

522. SMALL SUGAR OR PIE—A handsome prolific variety; fruits of small size, averaging about ten inches in diameter, of excellent keeping qualities, flattened and slightly ribbed. Skin deep orange, yellow flesh, fine grained and sweet. Postpaid; ib., \$1.00; 1/4 ib., 40e; oz., 15e; pkt.

RADISHES

CULTURE—The soil for radishes should be light, rich and well pulverized, as their mild and crisp qualities depend much on their rapid growth. For very early use, sow in mild hotbeds in January, and in open ground as soon as the ground can be worked; for succession, sow at intervals of ten or twelve days; they also do well sown

intervals of ten or twelve days; they also do well sown in the fall.

535. CHINA ROSE WINTER—Distinct, handsome variety of winter radish; skin deep rose color, flesh pure white, solid, of fine flavor; good keeper well into sprins. (Very large size and shape roots.) Ready for use in about 40 days. Postpaid; lb., 85c 1/4 lb., 30c; 10¢

(Very large size and shape roots.) Ready for use in about 40 days. Postpaid; b., 85c ¼ lb., 30c; 10¢ c., 15c; pkt.

536. CRIMSON GIANT—A large-sized extra early turnip radish. Grows quickly, and even when it attains large size, remains tender and of fine flavor to the last. A money-maker for the market gardener. Its bright crimson loicle color makes it a seller on first sight. Postpaid; 10¢ lb., 85c; ¼ lb., 30c; oz., 15c; pkt.

537. EARLY SCARLET TURNIP—A small, round, red, turnip-shaped radish with a small top and of quick growth. An early variety of rich color, crisp and tender.

Postpaid: lb., 85c; ½ lb., 30c; oz., 15c; pkt.

538. EARLY SCARLET TURNIP, WHITE TIP—A most popular and attractive variety, a great favorite in many large markets. The radish is bright scarlet, with white tip and of a beautiful shape; flesh white, crisp, and finely flavored.

Postpaid: lb., 85c; ½ lb., 30c; oz., 15c; pkt.

539. EARLY WHITE TURNIP—Very handsome; of quick growth; sweet, juicy and tender; skin ivory white, flesh pure 10¢ growth; sweet, juicy and tender; skin ivory white, flesh pure 10¢ migermination; makes very little top, and may be cultivated very close together. It is ovalshaped, skin bright scarlet, but tipped at the end with pure white. Postpaid; lb., 85c; ¼ lb., 30c; oz., 15c; pkt.

541. LONG SCARLET—It grows 6 to 7 inches long, half out of the ground. It is very brittle and crisp, and quick growth; color bright scarlet. Postpaid; lb., 85c; 10¢ inches long, half out of the ground. It is very brittle and crisp, and guick growth; color bright scarlet. Postpaid; lb., 35c; pkt.

542. LONG WHITE ICICLE—The finest finest part and stradish grown. Long slender root which remains tender and crisp until grown. Matures early, has small top which permits close planting. Considered by many to be the finest radish. Plant every 10 days for succession. Postpaid; lb., 85c; ¼ lb., 30c; oz., 15c; pkt.

543. LONG WHITE LADY FINGER—Beautiful in shape; skin and flesh are pure white, very crisp and tender; a most rapid grower and long s

## RHUBARB OR PIEPLANT

CULTURE—Sow the seed in cold frame in the spring and as soon as the plants are large enough transplant into rows 5 feet apart each way, and each spring work into the soil a liberal supply of decomposed stable manure. One ounce of seed will grow 75 feet of row.

RHUBARB ROOTS—Rhubarb roots are set out and cultivated as the above, and this method gives edible rhubarb in a very short time.

## SALSIFY OR VEGETABLE OYSTER

A delicious vegetable for winter use. Should not be used before frost and it is improved by remaining in the ground during freezing weather. Sow in shallow rows 18 inches apart early in the spring and let it grow all summer. One ounce of seed to 100 feet of drill.

546. MAMMOTH SANDWICH ISLAND—The write variety. Large and strong growing, with smooth, white, tapering roots and less liable to than any other kind. Postpaid; 1/4 lb., 750; 102., 250; pkt. with long, to branch 10¢

### SPINACH

Cultivated very extensively for "greens." A profitable crop for market. Select a rich well-drained soil, highly manured. For a succession sow early in April and again in May in drills I foot apart and I inch deep, properly thinning out when the plants are an inch in the leaf. For early spring use sow early in autumn and protect the plants with a light covering of leaves or straw.

547. BLOOMSDALE (SAVOY)—Earliest and best of all. leaves are numerous, curled and wrinkled.
Postpald; Ib., 60c; 1/4 Ib., 25c; oz., IOc; pkt.\_\_\_\_\_ 5¢

547A. NEW ZEALAND—The habit of growth is quite different from other plants, becoming quite bush-like in form. The tender growing tips are cut and used in the same way as other kinds of spinach. This variety endures hot weather, and makes a very strong growth during the summer. The more it is cut, the better it grows. Postpaid; lb., \$1.00; ½ lb., 45c; cz., 20c; 10¢

## Plant Early

# SOUASH

**Order Today** 

CULTURE—Squashes require a warm, fertile soil of sandy nature for best growth. Summer squashes grow mostly in compact bush form; hills for these should be about 4 feet apart; for long, trailing fall and winter varieties hills should be 8 to 12 feet apart each way. If ground is not very rich, two or three shovelfuls of well-rotted manure should be worked into each hill. Put 8 to 10 seeds in each hill, about one inch deep. When danger from bugs is over, thin from 3 to 4 of the strongest plants.

548. GENUINE HUBBARD—The well-known winter squash so largely grown throughout the country. Large size, dark green in color, hard shell, thick deep orange flesh of the highest quality.

An excellent winter keeper, none better.

Postpald; lb., \$1.50; ¼ lb., 50e; oz., 15e; pkt.

5¢

LIGHT WHITE BUSH, or PATTY PAN—The best early y. Plants are of true bush form and produce fruit very early

in the season. Largely grown in the South for shipment to Northern markets. Postpald; lb., \$1.40;  $\frac{1}{4}$  lb., 50e; oz., 15e; pkt. 5¢ 550. YELLOW SUMMER CROOKNECK-Plants are very productive and early-bearing; skin of fruit very thickly warted and of orange-yellow color. 5¢ Postpaid; Ib., \$1.40; 1/4 Ib., 500; oz., 15e; pkt .\_ 551. DELICIOUS—A squash of exceptional merit for table use. A fall and winter variety. The fruit varies in shape and size, weight ranging from 5 to 10 pounds each. Bind very thin, uniformly green; flesh very thick and dark orange color.

Postpaid; lb., \$2.00; ½ lb., 60e; oz., 20e; pkt.

## TOMATOES

Ask for Quantity Prices

CULTURE—For early crops sow in January and February in pote
and boxes, and place near a window or in spent mild hotbeds;
keep well watered; when plants are three inches high transplant
into another frame, to remain until ready
for planting out; this makes them strong and
stocky. If you wish the first fruits that set
to ripen quickly, pinch off the tops of vine
and later fruit shoots; all vining varieties
ought to be staked and tied up.
553. DWARF CHAMPION—A purplishpink variety, forming a strong, erect, bushy
plant. Often sold as a tree tomato. Fruit
smooth, medium sized, solid and good flavor.
Desirable for forcing, as it can be planted
close to the grass and more closely on the
bench than the tall-growing kinds. Postpaid; ½ lb., 900; ez., 300; ½ ez.,
10¢

paid; ½ lb., 900; ez., 300; ½ ez., 10¢
150; pht.

553. GLOBE—One of the newer sort of unquestionable merit. In season of maturity it closely rivals June Pink, perfecting its first fruits within a week after that recognized standard for earliness. But the fruits are very much handsomer, being nearly round, with a skin free of blemish, filled with solid meat. Globe is unusually prolific. Fruits are borne in clusters of 4 to 6 and frequently 5 clusters are carried by well developed plants of finest table quality. 10¢
1554. JOHN BAER—An extra early tomato; large, smooth, bright scarlet fruit of excellent quality. Short vigorous vines enormously productive. Fruits larger and smoother with less seeds than the Earliana but somewhat later. Plants are compact in growth with short close-jointed branches setting fruit very freely in the center. Pestpaid; ¼ lb., \$1.00; 10¢
1555. LIVINGSTON'S BEAUTY (Color Purple)—One of the oldest and still very popular in the great shipping centers for reason of its being always exceptionally smooth and uniform in size. One of the best main crop sorts. Pestpaid; ¼ lb., \$1.00; 10¢
1566. PONDEROSA—The fruit ripens early and bears well untill serve and all almost seadless; of good sub-acid flagor and

556. PONDEROSA—The fruit ripens early and bears well until very late; very solid, almost seedless; of good sub-acid flavor and of immense size, frequently weighing considerably more than two pounds. Postpaid; 1/4 lb., \$1.10; ez., 200; pkt. 10¢.

557. SPARKS' EARLIANA—One of the earliest. 35c; ½ oz., 20c; pkt. 104 557. SPARKS; EARLI-ANA—One of the earliest, medium size, of purplish-pink color, very prolific, fruits forming almost in clusters. Very handsome in shape, quite-solid, and of fine quality. Very popular for early market, Postpaid; ¼ ib., 90c; ez., 300; ½ oz., 10¢ 558. STONE—The Stand-

few of the points that put Stone in a class of its own. A great favorite with canners on account of its solidity and the great crops which it yields. Postpaid; 1/4 lb., 900; ez., 300; 10d. 10¢ ez., 15e; pkt.

559. SMALL PRESERVING TOMATOES—An interesting packet comprising a mixture of small preserving varieties, including Red and Yellow Cherry, Peach, Plum, Pear and Currant. Also yellow and purple husk tomatoes. These varieties are not only desirable for preserves, but dried in sun, packed down with sugar, make splendid substitute for figs. Postpaid; 1/4 ib., \$1.10; 10¢ ez., 350; 1/2 ez., 20e; pkt.

## **TURNIPS**

Ask for Quantity Prices

CULTURE—For summer use sow early in spring in light, rich or new soil, in drills 1½ to 2 feet apart according to size of the variety and cover one-half inch deep, or sow broadcast, but in either case be sure to have the ground rich and freshly stirred. Thin early and keep free from weeds so that the young plants will not be checked in growth. Any overcrowding will result in rough and poorly flavored roots. It is important to get the spring and summer crop started very early so that the turnips may have time to grow to sufficient size before hot weather causes them to become tough and bitter.

560. EXTRA EARLY WHITE MILAN—The earliest turnip. Tops very small, distinctly strap-leaved, and growing very erect and compact. Bulbs form earliest of any sort. The clean, white roots are smooth, flat, symmetrical and handsome in appearance. Flesh is white, tender, and sweet. Postpaid; lb., \$1.25; 5¢.

561. EARLY FLAT WHITE DUTCH—A guick-growing, medium-

561. EARLY FLAT WHITE DUTCH—A quick-growing, medium-sized root for early spring or fall planting. The skin and flesh are both pure white, the latter being quite tender and sweet. Is flat with a fine tapering root; the leaf is strap-shaped. For home use there is no turnip that we would rather recommend. Postpaid; lb., 75c; 1/4 lb., 30c; cz., 10c; pkt.

562. LARGE YELLOW, or AMBLER GLOBE—A popular, yellow-fleshed, sweet-flavored turnip that produces a good crop and will keep in perfect condition until spring. It is globe-shaped and size averages large. It is highly esteemed by housewives for table use and popular for stock feeding.

Postpaid; ib., 7501 1/4 ib., 30c; oz., 10c; pkt.

5¢

563. PURPLE TOP STRAP-LEAVED—Most widely cultivated and best known variety. Used largely for sowing broadcast among corn and potatoes. It is round and flat, white on the bottom and reddishpurple above ground, and a very quick grower. Fine table variety. Postpaid; lb., 75e; ½ lb., 30e; 5¢ ez., 10e; pkt.

564. PURPLE TOP WHITE GLOBE

Of a perfect globe shape, almost six inches in diameter with smooth, white skin; flesh pure white, firm and crisp, and of quick growth. A good keeper and is fine for market.

Postpaid; ib., 75e; ½ ib., 30e; 5¢

vz.. 10e; pkt.

Early Flat White Dutch

Postpaid; 10., 70c; 1/4 Ib., 80c; 02., 10c; pkt.

567. RUTABAGA—All kinds of stock relish Butabagas, and thrive upon them when fed in combination with hay. If sown the last of July or the first of August, the tops make an excellent pasture for sheep during the autumn and the turnips furnish succulet food for them throughout the winter. Yields 20 tons to the acre. Postpaid; Ib., 75c; 1/4 Ib., 30c; 02., 10c; pkt.

5¢

## New Crop Pure Seed

CULTURE—Plant in hills 8 or 10 feet apart, dropping ten seeds to the hill; thin out to three plants to the hill; cultivate until the vines cover the ground, and plach the ends of the early shoots to induce early fruiting.

497. CITRON—Grows uniformly round and smooth, striped and marbled with light green, flesh white and solid, seed red. This variety is not used for eating in the raw state, but for preserves, pickles. etc.

Postpaid; Ib., \$1.00; 1/4 Ib., 35c; oz., 15c; pkt.\_

Postpaid; lb., \$1.00; ¼ lb., 35c; ez., 15c; pkt.

498. GEORGIA RATTLESNAKE—The fruits are long, light green in color, with mottled stripes of a darker shade. The flesh dark red, very tender and sweet. Postpaid; 5¢ 499. HALBERT'S HONEY—One of the finest melons for the home garden, of superb luscious quality; medium large, oval; dark glossy green; flesh bright crimson. Very tender and sweet. Postpaid; lb., 800; ¼ lb., 35c; ez., 15c; 5¢ pkt.

500. IMPROVED KLECKLY SWEETS—Special strain of this grand market gardener's melon. Large, oblong, 26 inches in length by 10 to 12 inches in diameter, dark green, flesh bright scarlet, rind only about half an inch thick. Extremely sweet. Pottpaid; lb., 40c; cz., 15o; pkt.

501. IRICH GRAY—This melon is large, the rind a mottled greenish-gray. The flesh red, crisp, free from stringiness and as sweet as honey. A little earlier than Tom Watson.

10¢

10¢

502. TOM WATSON—The finest all-purpose melon. The average size 24 to 28 inches long and 12 to 14 inches in diameter. It has a dark mottled green rind, thin, but tough enough to stand simplying long distances. The seed we offer is of the very best strain. Postpaid; lb., \$1.10;

10¢

Imp. Kleckly Sweet

## Flower Seeds

The beauty and fragrance of our garden flowers fill a place in our lives that nothing can replace. Some vines or tall plants may be grown to make more sightly some fence or pile of stone or stump or building. Some plants can be grown in a partial shade where grass does not grow and others are serviceable in hanging baskets, vases, or veranda boxes. Some plants used for cuttings bring the sunshine to those that must live indoors, while others are useful for cemetery lots, a tribute to those that have gone before us. Borders, beds and masses of flowers may appeal to us most as "the bouquets that live." Most flowers are as easy to grow as vegetables. The same practices that promote the growth of grains, vegetables and fruit apply to flowers. Most seed should be covered four times its flowers. Most seed should be covered four times its flowers. Porined, moist, warm, mellow soil should be the flower's home, not soil that is wet or soil that will bake. The seeds we are offering are the best that we can procure, all thoroughly tested before we send them out.

## Flower Seeds are Postpaid

AGERATUM MEXICANUM-650. AGERATUM MEXICANUM—A hardy annual which produces an abundance of light blue and lavender flowers throughout the summer. Flowers are very desirable for bouquets. Plants will also do well in the house if potted in the fall before 10¢ frosts. Height, 12 inches. Pkt.

for a succession of bloom. Pkt. 10¢ 652. ANTIRRHINUM, or SNAP DRAGON —One of the most desirable flowers for general garden culture. They come in great quantity of colors and are as equally good for bouquets or for mass planting. They are blennials but can be handled as annual also when sown early inside. They bloom in July and then until frost if covered up alightly. They go through the winter and bloom abundantly the second year for extra early flowers. Start in the house and transplant outdoors when weather 10¢ 653. BACHELOR BUITTON (Banged Bubin)

BACHELOR BUTTON (Ranged Robin)

653. BACHELOR BUTTON (Ragged Robin)—One of the most popular and desirable of old-fashioned garden annuals. Good for bouquets when mixed with other 10¢ flowers. The plants reseed. Pkt. 10¢ flowers and Touch-Me-Not, forming neat symmetrical tree-like plant and a profusion of double and semi-double wax-like flowers in the most brilliant colors. Of easy culture, but don't plant the seed until the ground gets warm, as they are rather 10¢ flowers. Best mired colors. Pkt. 10¢

655. CANDY TUFT (Giant Hyacinth) — One of the most useful and popular annuals Completely covered with clus-ters of flow-ers that are esteemed for bou-quets; are also grown bord 9.9 der plants. Aster

large, and are pure white. Pkt. 10¢ here, and are pure white. PKL. 1046

556. CARNATION (Marguerite Mixed)—
These lovely fragrant carnations produce fine double flowers from seed sown in the garden early in the spring. When well started, the young plants should be transplanted to stand 12 inches apart. They are quite hardy, flowering the first season until late in the fall, and can be potted for winter blooming. Mixed colors. Pkt.

CHRYSANTHEMUM (Mixed)-These 657. CHRYSANTHEMUM (Mixed)—These are not the large varieties grown and handled by florists. The annual varieties we offer are of many beautiful colors and similar to large daisles. If the shoots are nipped off when the plants are young they become more bushy, For early bloom start indoors, or sow where plants are to 10¢

"As ye sow, so shall ye reap." There was a time when every farmer saved his own seed from year to year. But those days are gone. It is no more economical for the average farmer to bother about saving his own seed of the field crops he will plant than it is for him to make his own shoes or clothing.

Not everyone can grow seed that is fit for planting—seed that not only will have high germination and strength to grow into maturity, but which will reproduce the parent type in all purity.

To produce seed for planting is a business in itself; and to buy seed that has been grown altogether for planting gives one a better grade of seed for less money.

our Field Seed Department, we exercise anything the seed for less money.

of seed for less money.

In our Field Seed Department, we exercise every possible care to have our stocks of greatest purity and virility. Every item that we list has been grown under the most favorable conditions to maintain the purity of the strain, and retain the utmost strength in the seed. Every item is carefully

strain, and retain the tested by us for germination and is superior to the legal standard before it is packed for standard before it is packed for shipment. We take the greatest of pride in the quality of our farm seeds, and the rapid growth of our trade in this department speaks most forcefully of the way our customers have appreciated and profited through the use of our seeds.

PRICES on Field Seeds are always subject to market changes.

PRICES on Field Seeds are always subject to market changes; in quantities of more than one pound. Some kinds of seeds vary in price almost daily. Because of this, we ask that you let us quote you by letter on your requirements at the time you are ready to buy. In that way we can give you the benefit of the lowest prices the device. fit of the lowest prices the day your order is received. We received. We prepay the postage on one pound lots of all field seeds, as indicated in this catalog. We do not prepay the express do not prepay the capross or freight charges on larger quantities.

LET US HELP YOU improve your crops. We have put time, money and painstaking care into our assortment of farm seeds,

our assortment of farm seeds, and not only can we supply you money elsewhere, but we can help you in an advisory way, to grow bigger words from the same amount of ground. Write to us about what you have been growing, and what you want to be you the benefit of our years of experience with farm quantities of seeds that you want to plant. We have had many years of experience with field seeds, not alone as seedsmen, but as farmers, for every year we raise immense fields of various kinds.

The picture below is a photograph of the first cutting of hay from one of our fields of red clover here at Fayetteville, Arkansas.

The picture at the bottom of this page shows one cutting of red clover hay from one of our fields. This field had been in nursery stock for several years, and the soil was in need of a rest before being again planted to trees. Through the use of the red clover, we not only improve the fertility through the addition of nitrogen gathered by the red clover from the air, but we also improve the texture of the soil through the addition of the organic matter from the clover roots and stems.

If you have a rotation problem, soil improvement problem, or the problem of how to get the most dollars out of your land, write to us about it. We will be very glad to help you.

SEND YOUR ORDER EARLY. Every year there is a shortage in the supply of some kinds of field seeds. One year it is one thing, another year it is something else. Early orders consequently are much more liable to be filled completely than are those which are held until the last minute. We always appreciate early orders.

## IT IS EASY TO ORDER

Use the order blank with this catalog, filling in the blank lines with your name and address, plainly written. It is not necessary that you write out the names of the varieties you want, as all items have a variety or offer number. Use the number instead of writing the names.

## **How To Send Your Money**

The safest way is by money order, either postal or express, or bank draft. Your personal check will be accepted. It is unsafe to enclose currency, unless it is securely folded in heavy paper and registered.

## How To Have Your Order SHIPPED

We prepay the transportation charges on many of the items in this catalog. These are plainly marked "Postpaid." Other items are sent by to less or freight, charges collect. Be sure prefer, othe which form of transportation you method. method

# ARKANSAS SEED & NURSERY CO.

# ALFALFA

806. ALFALFA—This is the most valuable of all perennial hay crops. It produces a hay of the highest feeding value and one that is relished by all farm animals. At the same time, its deep penetrating roots loosen up the soil and add nitrogen, as do all leguminous crops. In this way, alfalfa improves the texture and fertility of the soil for crops that may follow. Alfalfa hay is the most profitable hay to grow, and when alfalfa is once well established, it will endure for many years with little or no attention other than that of cutting the hay three or more times a season. It is the one crop that will produce two tons of high priced feed stuff where only one grew before. Plant alfalfa and get some of the great revenue that comes from growing this profit-making legume. Don't let your neighbor grow bigger and better crops than you do simply because he grows this big money crop, and improves his soil at the same time. The returns from an acre of alfalfa will far exceed that of any other similar crop and make the land richer at the same time. Think of that! Make the land richer! What you get off as hay isn't all there is to alfalfa. Much of its real worth is left in the ground for the benefit of other crops. Alfalfa is a cash crop and a soil improver at the same time. Plant it and profit. If you have never grown it before, inoculate it before you plant it and you will have all the better crop.

will have all the better crop.

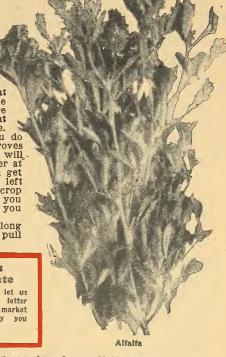

Plant alfalfa. Be an up-to-date farmer. Don't try to squeeze along and make a bare existence in the same old rut. Alfalfa will pull you out of the hole if you will give it a

chance.

taken in planting the very best of seed. Poor seed is expensive at any price. Your seed bed should be plowed very early in the spring, or what is better—the fall before. Just before planting the seed, work the surface into a fine state of cultivation by harrowing and dragging.

Use the best grade of seeds, and if your land has never had alfalfa on it, inoculate with some of the culture listed in the back of this catalog.

Just as soon as the danger of hard freezing weather is over drill your seed at the rate of 16 to 20 pounds to the acre.

## Prices Fluctuate

On quantities; let us quote you by letter the lowest market price the day you want to order.

Ask us for samples of our alfalfa seed and prices on quantities. We will be glad to send them to you.  $30\phi$ 

## RED CLOVER

800. RED CLOVER—Without a doubt, red clover is the backbone of present day successful farming. It is a hard proposition for a farmer to get along without the use of red clover, as it is a soil improver of first rank, and a hay producer of tremendous value everywhere. The hay cures readily and is of excellent feeding value for all farm animals. As a pasture crop it has no equal where one only intends to pasture the land for a short time and then put

Red Clover

into other crops. builds up the land through the addition of nitrogen to the soil. Timothy frequently is planted with red clover, and for pasture purbination will pare the satisfaction of a nice field of alese two crops. As a cover crop for an orchard, red clover is without an equal. Every orchard should be seeded to red clover every few years and the hay allowed to remain right on the ground as a mulch, or plowed under. The price of clover seed in quantities fluctuates greatly. We are always glad to quote the current price by letter. Ask for our quantity prices. Postpaid \_\_\_\_45¢ Per Pound,

## YETCH

809. WINTER OR HAIRY VETCH—For soil improvement there is hardly any crop that fits in so well under all conditions as Winter Vetch. It is a heavy carrier of root tubercles and these increase in size and number more in cold weather than with any other legume. It will grow and enrich the soil during the fall, winter and early spring, and in many sections of the South it will produce an enormous crop during the winter months when other crops would be dormant. It does well on poor lands where clovers fail. It needs a good seed bed with plenty of moisture to begin with, but after it is established it will withstand almost any degree of heat or cold or drought. Like all legumes, it gathers nitrogen from the air and deposits it in the tubercles on its roots. When being grown

from the air and deposits roots. When being grown on land that has never pro-duced Vetch before, the seed should be inoculated before being planted. Winter Vetch forms such an excellent forage crop for early spring that it is becoming very popular for this use alone. It supplies a very excellent and suc-culent forage just at the time the appetite of farm animals is beginning to lag from the long winter's feeding on dry forage. Plant a few acres of it this season. It will not disappoint you for it is not only an excellent soil improver but an excellent forage crop as well.

Per Pound, Postpaid......30¢

## WHITE CLOVER

Write for Quantity Prices

803. WHITE CLOVER—This low growing, perennial clover is among the most valuable of honey plants, producing a grade of honey that is equal to if not superior to affaifs honey. It makes an excellent pasture, especially when mixed with the seeds of pasture grasses. It is highly valued in lawns. A little White Clover seed mixed with blue grass makes a splendid combination for an all-year green lawn. Postpaid; i ib. \$1.00

### SWEET CLOVER

Sweet Clover

COW PEAS

Write for Quantity Prices

Make poor land rich, and rich land more productive. Cow Peas are especially valuable as a "catch crop" for forage or hay and there are many million acres of land in the Middle West that could be improved in productivity by sowing Cow Peas after wheat has been harvested. Cow Peas require from 70 to 90 days to mature a crop of peas, and if the crop is put in the last of June or the first half of July there will be plenty of time for the wheat crop to mature as well as to produce a good hay crop. The same land can be used for seeding wheat again in the fall months. 816. WHIPPOORWILL—A favorite early-maturing variety of medium growth. The seed is reddish-brown speckled.

## **MUNG BEANS**

824-A. The greatest forage crop of the present. As compared to the Soy Bean the stalk is more tender for stock to eat, puts more nitrogen in the soil and will take only one-fourth as much seed to plant an acre. Four pounds plants one acre. Can be planted in rows 3 to 3½ feet apart. The beans make the finest chicken feed, and the stalks are the finest chicken feed, doubling the yield of cow peas to the acre. One of the greatest drought resisters knewn. Can be planted on any kind of soil, but it wou want to improve your land, plant MUNG BEANS.

1 ib., postpaid.

500 LAWTON 500 McDONALD The Best of the Blackberries

These are the most profitable varieties to grow; hardy, disease resistant; heavy croppers. You will make no mistade in planting these blackberries this spring. As aller in a young orchard, they are fine, brings in big profits while the trees are coming into big profits while the trees are coming into pring. McDonald is an early fruiter, and bring top prices because of its earliness. Lawton is excellent market berry, and a good pollenizer for McDonald. Both varieties are endorsed by the largest commercial growers and horticulfor McDonald. Both varieties are endorsed by the largest commercial growers and horticulturists of the Southwest as money makers. Don't delay planting these fruits. We make you this bargain offer of 1000 plants for \$33.75 to get you started on the road to Big Money, and have you as a regular customer. We send you strong, one-year plants

you strong, one-year plants by express, charges collect.

# ARKANSAS S

## SOJA OR SOY BEANS

Write for Quantity Prices

826. This valuable forage and fertilizing plant is similar to clover in its habits of growth, but produces pods filled with nutrifious beans, relished by all kinds of stock. For pasturing or feeding as green fodder it is very valuable, and nearly equal to clover for fertilizing. Because of its erect habit of growth, they are far easier to harvest and cure than the Cow Pess. A larger crop may be secured by planting and cultivating like corn, cutting with a corn binder and curing in shocks. I lb., postpaid. 15¢

Spanish Peanuts

## **PEANUTS**

Write for Quantity Prices
821. SPANISH—This is the most
popular variety in the Middle West
and Southwest, because of its value for
forage and feeding purposes. It is the
largest producer in pounds per acre, but
on account of the small size pods, it
costs a little more to harvest it than
with the larger podded varieties. The
nuts are always very sweet and finely
flavored; are more free from undeveloped kernels than any other variety.
822. TENNESSE RED—This is the
best of all varieties adapted to sandy
soil. Grows very successfully in most
of all the Southern states. Pods are
long and have 3 to 5 large kernels in
them. We are offering a pure strain
of this seed.

BUCKWHEAT

Write for Quantity Prices

815. GIANT JAPANESE—The great midseason crop. Can be sown as late as July and make a bumper yield. Every farmer should have at least 5 acres. Sow ½ bushel per acre. Averge yield 30 bushels per acre. Big money-maker. One of the best plants for bees to feed on. 1 lb., postpaid.

## SUNFLOWER

Write for Quantity Prices

825. MAMMOTH RUSSIAN—The largest of all Sunflowers. One of the best paying crops that can be raised for chick-feed. Seeds are the best of food for poultry and is much cheaper to raise than corn. It also affords protection against malaria: Plant as you would corn, and about the same amount. 30¢

## RAPE

Write for Quantity Prices

817. DWARF ESSEX—Where there are hogs there should also be Dwarf Essex Rape. Under favorable circumstances, Dwarf Essex Rape is ready for pasture in six weeks from time of sowing. One acre of good rape will carry a dozen pigs for two months. One of the experiment stations found that an acre of Rape produced as much gain on pigs when used for pasture crop along with grain as 56 bushels of corn would produce. In addition to the feeding value of Rape, the hogs are bound to be stronger and gain more rapidly on the Rape pasture than the ones which have been fed on grain alone. A plant with as great feeding value as Rape should find a welcome on all farms where hogs are raised. An acre of Rape in the except of producing was much less, and the cost of harvesting was nothing, as it was done by the hogs. Also fine for chickens and turkeys.

1 lb., postpaid.

30¢ lb., postpaid\_

## TIMOTHY

Write for Quantity Prices
813. As a grass to cut for hay, Timothy is the standard everywhere. It is the great non-leguminous hay crop and does better in the northern half of the United States than it does in the southern half of the country. Our Timothy seed is all new crop seed, the only kind that is worth buying. Send for samples and prices.

1 lb., postpaid 25¢

DOING FINE

I ordered peach trees from you the first of April and every one is growing and doing fine. I feel so proud of them and show them to everybody. Am well pleased with my purchase.—MRS. A. J. SMITH, Kansas.

PLEASED WITH THEM
I received your shipment of the 20th, apple trees and I grape vine, all in first class condition and I sure am well pleased with them.—CLYDE T. PHELPS, Missouri.

Timothy

## MILLET

Write for Quantity Prices
820. GOLDEN or TENNESSEE GERMAN—This is the most popular variety
and much superior to Western or the
ordinary so-called Millet. Try some of
both and compare results. This is the
Millet that has enormous big heads and
wide leaves. It is the rankest of all
Millets, growing from four to five feet
high, and makes lots of feed either as
hay or grain. Can be sown as late as
July in this latitude, and on that account
is valuable where other crops have been
washed out and lost.

15¢ lb., postpaid\_

## OATS

Write for Quantity Prices

804. RED RUST PROOF—This excellent variety continues to live up to its
name—rust proof. If your oat crop was
a failure last year from rust, try Red
Rust Proof this year. It is giving excellent satisfaction, and is the standard
variety for this locality. We do not believe you can beat it for heavy yields.
Because of the market fluctuation of
prices we ask that you write us for
prices when you are ready to buy.
805. EARLY MAY—A variety that
ripens very early. It does well even on
this poor land, and in many localities is
preferred to all other varieties of oats.
The seed we offer was grown in Washington County, Ark, where the variety
reaches its perfection. Write for prices
at planting time.

TREES O. K.
I received the trees all o. k. I thank you for the trees. They arrived in good shape, They are just doing fine.—
T. E. BRASWELL, Arizona.

Red Rust Proof

## SAVE MONEY

If you want to make a big saving on the cost of the Field Seeds you will need for planting this season, send in your order NOW. Prices always go up as planting time nears. And the stronger the demand, the more rapidly prices advance. By buying your seed early—even months in advance of planting time—you buy when the demand is weakest and prices lowest. Early buying is an easy way to save money.

We are always glad to quote quantity prices on field seeds, and especially glad to have our customers take advantage of the low prices that prevail very early in the season.

Remember the old proverb—"A penny saved is a penny earned." And it comes lots easier. You don't have to sweat and work and fight bugs when you save money by buying early. Send Your Order NOW.

Have You Ordered Apple and **Peach Trees** 

## BERMUDA GRASS

812. Very fine for binding loose and dry soils. The habits of this grass is to set roots at each joint that touches the ground, thereby forming a complete sod. Furnishes excellent pasture. It decidedly a summer grass, as it does not start off until ground is thoroughly warm in the spring, and turns to a buff color after filling frost in the fall. We believe this grass will help solve the pasture question during the hot, dry summer months. Best time to sow Bermuda is about the last of February or any time during March. But will not germinate until the ground gets warm. Sow on top of snow or just before a rain if possible. Also valuable in some sections as a lawn grass. Sow 3 75¢

## KENTUCKY BLUE GRASS

### ORCHARD GRASS

Write for Quantity Prices

813-A. Adapted to middle United States, especially what is known as the Ozark section. Wherever it has been given a fair trial it has been placed in the front rank of grasses for permanent pasture. It is a rank deep root perennial and it does not form true sod as it grows in bunches. It starts very early in the spring and keeps on growing during the summer months. It resists drouth better than Timothy and blue grass and grows well in the shade. You may plant orchard grass any time during the fall or winter and would recommend sowing on top of snow if the ground is well prepared. I ib., postpaid

## **RED TOP OR HERD'S GRASS**

## SUDAN GRASS

811. A sweet, heavy-yielding grass; absolutely drouth-proof and grows successfully everywhere sorghums will grow. Livestock of

Offer No. 1010

## Suburban Strawberry Collection

250 Michel Early Plants 500 Klondike Plants 250 Progressive Everbearing

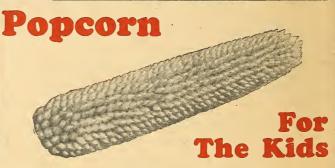

This assortment has been especially selected for us by a prominent horticultural authority as just right for a suburban garden. It will plant an area large enough to furnish all the berries a big family can use, and leave some to sell. It is nicely balanced with early, mid-season and everbearing kinds and just enough of a kind to give a lavish supply of fruit. Set them this spring and the Progressive Everbearing will bear Progressive Everbearing will bear fruit for you this summer. Next year all will be in bearing. The plants we send you are all produced on new ground in the "Heart of the Ozarks," and are full of vitality.

all kinds eat it greedily and as forage for cattle it will add weight more rapidly than any other variety of sorghum grasses. Yields more pasture per acre than any other annual forage crop. Sudan is absolutely free from the objectionable root system which makes Johnson Grass so difficult to eradicate. Sudan Grass is an annual and requires reseeding each year. It is no more difficult to get rid of than sorghum, cowpeas or other similar crops, and it may be sown, either drilled in cultivated rows 3½ feet apart, or broadcast. For drilling rows 3½ feet apart it will require 3 to 6 pounds per acre, depending on the cultivation of the land. Broadcast it should be sown 20 to 25 pounds per acre. The seed should not be sown until the ground is warm in the spring; in this latitude about May 15th is the earliest practical date. The first hay crop will be ready to harvest about 45 to 50 days from date of sowing. The second crop from 30 to 35 days. The third crop from 30 to 35 days. If you wish to save a seed crop from Sudan it will require 80 to 90 days from date of sowing the seed until the seed crop is to be harvested. After threshing, the straw will prove as nutritious as any other variety of sorghum. Sudan may be sown as far north as any other variety of sorghum. Sudan may be sown as far north as any other variety of the sorghum family. In many states it is going to supersede millet as a forage crop because it produces so much more tonnage per acre and the quality of the foliage is so much better. 20¢ 1b., postpaid

## Have You Included Sweet Clover

In Your Order?

This grand clover is giving farmers so much satisfaction for soil improving purposes, and as a hay crop that it has fairly leaped into popularity and become a staple crop. If you have never grown this wonderful legume, try some of it this year. The seed is cheaper than red clover or alfalfa and it produces results quickly. Plant some of it this year and give it a trial for hay. See how its deep penetrating roots loosen up the soil, and how other crops will flourish when you plow the sweet clover under. It will produce a wonderful leguminous pasture for your hogs and stock and build up your land faster than with more expensive crops.

Plant at least a few rows of popcorn for the children. They will love to eat it next winter. It is nourishing. It is appetizing, and few things taste half so good on cold stormy nights of winter as a big dish of popcorn hot out of the popper! And popcorn balls! They are ever so good—just the things that mammas like to make for their little girls and boys to munch on when they come home from school. An apple in one hand, a popcorn ball in the other! What a treat for the kiddies! Here are two excellent varieties of popcorn:

801. BABY RICE—Small ears and 802. WHITE RICE—A very fine vasmall grains which pop to a fair size. The popped corn is deliciously tender and will bring a premium on the 10¢ Postpaid; ib., 30c; pkt. 10¢ Postpaid, ib., 30c; pkt. 10¢

# ARKANSAS SEED & NUR

## THE NON SACCHARINE SORGHUMS

For dry land and poor land no grain and forage crop produces heavier yields than do the non-saccharine sorghums listed below—feterita, milo maize, and kaffir corn. These crops succeed in the driest seasons when ordinary corn fails completely. In weight of grain, these crops will yield even more per acre than ordinary corn on the same land. And in the way of dry forage they are all heavy producers of a very palatable forage that is relished by livestock. They are cultivated in the same way as ordinary corn and will grow on the same kind of land, or even on land too poor and too dry for corn. With all of the non-saccharine sorghums, the stalks should be cut and shocked to cure as soon as the grain has begun to glaze. The curing of the forage should be thorough, and the hay perfectly dry before it is stacked. This will avoid the souring that is otherwise liable to occur. The seed from these sorghums is threshed in an ordinary thresher from which all but one row of concave teeth have been removed. For dry lands in the Southwest, these non-saccharine sorghums are the most valuable of forage crops. If you have never grown them, try some of them this year. If you grow them regularly, let us quote you a price on the seed you will need this season.

## **FETERITA**

Write for Quantity Prices

819-A. This grand forage crop came to this country from Egypt. In many ways it is similar to Kaffir, but grows a little taller and produces larger heads. The two best features about Feterita are its wonderful ability to produce a crop in the dryest kind of weather, and the earliness of its maturity. It will mature a month earlier than Kaffir.

Chinch bugs do not bother Feterita. The grain of Feterita is similar to that of Milo but is pure white, larger and softer. It is planted in rows like Kaffir and Milo, requiring about 8 to 10 pounds to plant an acre, or in very dry localities, perhaps only half this quantity; cultivation is the same as for Kaffir.

1 b., postpaid. Ib., postpaid\_

MILO MAZE

Write for Quantity Prices
818. Milo Maize is a heavy cropper and
splendid drought resister and one of the
surest grain crops for the dry lands of the
Southwest. It is planted and handled in
the same way as Kaffir, but as it has a
softer grain it should not be planted so
early. Milo makes an excellent feed for
all poultry and livestock. 20¢ Ib., postpaid....

## FORAGE SORGHUM

824. EARLY ORANGE—Later the Amber, the stalks shorter and heavier. For forage or ensilage it is first class. One of the heaviest producers of the entire Sorghum 15¢

Milo Maize

## KAFFIR CORN

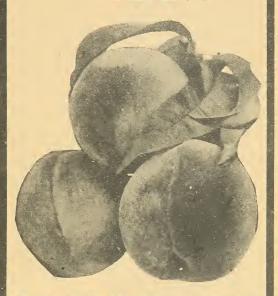

RAFFIR CORN

819. WHITE—As a fodder and grain crop Kaffir Corn is one of the best, particularly in dry seasons, or for the dry sections of the Southwest. In dry locations, Kaffir Corn is a much better crop producer than ordinary corn, turning off a better crop of grain, and producing a fodder that is greatly reliabled by livestock. Where Kaffir is to be grown for its grain, it should be sown in rows and cultivated like corn, but where it is to be used as a forage, it is sown broadcast, usually at the rate of 75 to 100 pounds to an acre. Kaffir Corn is an excellent grain for poultry, and chicken farmers would do well to grow a sufficient amount of it for that purpose. The grain is much relished by all livestock. I lb., pestpaid

and barns by spraying with suitable materials. Easily and cheaply done, and thoroughly disinfects at the same time. Nothing like it when cholera is prevalent. All fruit trees and garden crops need to be sprayed, and here are some of the best sprayers made for orchard and garden use. If you have no sprayer, send for one of these outfits today. It will make more money for you, in crops saved, than any similar investment you can find. We carry the following sprayers in stock and can ship any of them from either our warehouse, or from the factory at Ashland, Ohio:

Fig. 639

Fig. 1726. MYERS' COG GEAR LEVER BUCKET SPRAY PUMP—With agitator, complete with detachable hose and graduating Vermoral fine, sprinkling and solid stream nozzle. \$7.75 ARE F. O. B.

Just the thing to put on the trunks of trees to keep bugs and ants away from the tops. TREE TANGLEFOOT will effectually protect shade and fruit trees from most of our destructive insect pests. Particularly recommended against Canker Worms, Brown-Tail Moths, Tussock Moths, Gypsy Moths, Climbing Cut Worms, Ants and Woolly Aphis. One application stays sticky three months or longer (ten to twenty times as long as any other effective banding compound). One pound makes about ten lineal feet of band. It will not soften, run or melt, yet is always elastic, expanding with growth of tree.

FOR TREE SURGERY—Superior to anything on the market for painting wounds. It is the best application after pruning or trimming. It will waterproof crotch, cavity or wound when nothing else will.

else will. Price, F. O. B. Dallas: 25-lb. wooden pails, \$9.75; 20-lb. cans, \$8.00; 10-lb. cans, \$4.25; 5-lb., cans, \$2.25; 1-lb. cans

## **Broadcast Seeder**

Here is just the thing that you need for broadcasting grain and grass seed on small grass patches of ground, or on rough land that you cannot get onto with a grain drill. You will more than save the cost of it on seeding a very few acres of very few acres of ground, and have the seed more evenly scattered than if broadcasted by hand. The strong shoulder strap allows the seeder to be

carried with ease, and in just the right position for operation. Full directions for use accompany each machine. Include one of these seeders with your order for grain or grass seed. Price, postpaid...

I thank you very, very much for the seeds and Cabbage plants you sent me. I received them the 27th day of March and was over-satisfied with them. If I need more seeds I will always order from you.—DAVE LOMBAD, Wilburton, Oklahoma.

I received my order for 20 Apple trees and 12 Peach trees and will say they reached me in good condition. I have them set out and they look fine.—W. B. HIGGINS, Butler, Oklahoma.

Seeds of all legumes—beans, peas, clover, alfalfa and related crops—will yield far better if incoulated with Farmogerm, and in addition leave in the soil a heavy deposit of nitrogen which benefits all succeeding crops. Gardeners and farmers who have used FARMOGERM would not be without it. FARMOGERM Stave Good Indefinitely and always has its full strength. Just add water and shake the bottle and sprinkle over the seeds as directed. Your crop will benefit beyond your expectations. FARMOGERM is Economical. The one-acre size bottle of FARMOGERM is sufficient for 15 pounds of clover, 20 pounds of alfalfa, 40 pounds of vetch, etc. When ordering, be sure to state what crops you wish to inoculate. New scientific methods of manufacture have given lower prices. You cannot now afford to do without FARMOGERM is prepared for peas, beans and sweet peas—'4-acre size only. You'll get more peas and beans, and larger sweet peas by using this. Ask for No. 5. Price, 50c. FARMOGERM prices are: 12-acre size, \$9.00;

Full directions accompany each bottle.

Full directions accompany each bottle.

An All-the-Year Fertilizer for Garden and House Plants

Growers of fine flowers, shrubs and vegetables for the best markets and for exhibition, fertilize and stimulate them frequently, a little at a time. An excellent fertilizer for this purpose is Stim-UplanT, an odorless, highly concentrated plant-food, in tablet form, with guaranteed chemical analysis of 11 per cent nitrogen, 12 per cent phosphoric acid, 15 per cent potash. The proportions are accurate, there is no unnecessary filler (and in this form you are able to apply plant-food exactly when and where and as needed, Order Stim-U-planT tablets with your seed and plant order. Price, 1,000 tablets for \$3.56; 100 for 75e; 30 fer 25e;

## hick Supplies

Round Feeder

A great feed and chick saver. Chicks can't get in and contami-nate the feed or water, nor get water, nor drowned. 6-inch size size, 8

15¢ Each

8-inch size, 12 holes.

FOUNTAIN AND FEEDER

Nicotine Sulphate— Per Cent Nicotine his is the insection

Per Cent Nicotine Sulphate—40
Per Cent Nicotine This is the insecticide that is so highly recommended by Experiment Stations. It destroys Aphis (plant lice), Thrips, Etachoners on all tree, bush and vine fruits, flowers and shrubs; also Apple Red Bug, Pear Psylla and similar soft-bodied sucking insects—all without injury to foliage. May be combined with other sprays. Highly concentrated. Soluble in water—easy to mix—does not clop nozzles. You cannot go wrong by ordering "Black Leaf 40" for sucking insects. 10 pounds, \$15.50, makes 800 to 2,500 gallons spray; Jounds, \$3.75, makes 200 to 500 gallons spray; three 1-oz. packages, \$1.25, makes 40 to 120 gallons spray; 1 ounce, makes 6 gallons spray; 1 ounce, makes 6 gallons spray.

## THE DIRECTOR

## ORDER NOW

Send your order early, just as long ahead of planting time as possible. This avoids the last minute rush, allows a better selection of stock for you. Look through the catalog, make your selections and send your order today.

### **OUR TERMS**

Our prices are low as we sell for cash with order only. In the case of large orders for nursery stock an exception is made to customers who have a satisfactory bank rating, and who send a deposit with their order amounting to one-fourth of the total.

## TRANSPORTATION

All orders amounting to \$10 or more are sent Transportation Prepaid, except field seeds, and as otherwise noted. Orders for less than \$10, when you want the shipment prepaid, must be accompanied by 10c for each dollar's worth, to pay the transportation. Field seeds in quantity more than one pound are not prepaid, unless arranged for. Free goods given with purchases of certain amounts, apply only where order is made up from regular catalog prices and not to special collections where catalog prices are greatly reduced.

## COMPLAINTS

If there is anything wrong with your order when it arrives, please write us about it immediately, and satisfactory adjustment will be made. Remember we guarantee satisfaction or will refund money. Plants are living things, and through unfavorable climatic conditions, insects, fungi or neglect, they may fail to live after being planted. This makes it impossible to guarantee the trees or plants to grow. We guarantee safe arrival, and stock to be in good living condition and true to name.

## TREES TRIMMED FOR PLANTING

One of the commonest causes for trees not doing well after they are planted is because they were not suitably pruned beforehand. We prune all of our trees—tops and roots—in the most scientific manner before they are packed for shipment. This assures you of receiving your trees trimmed just right for planting, and ready to put right in the ground.

## **NON-WARRANTY**

The Arkansas Seed & Nursery Company gives no warranty expressed or implied as to description, quality or productiveness of any plants, bulbs, seeds, or any other matter that we send out; and will not in any way be responsible for the crop. If the stock is not accepted on these terms they must be returned at once and your money will be refunded. This is because of soil and climatic conditions, the method of planting and handling the crop, and other conditions over which we have no control. control.

## HOW TO ORDER-IT'S EASY

Use the order blank. Write your name and address plainly. Be sure to state how you prefer to have your stock shipped—mail, express or freight. Mark the quantity of each variety and write in the name of the variety, or use the catalog number. Carry out the prices correctly, total the amount, attach your check or money order and it is ready to mail.

## SPECIAL QUOTATIONS

We are always glad to make special quotations by letter on large quantities of any variety not priced in this catalog. Write to us about the varieties, sizes and quantities you want and get our estimates. We are always glad to make especially low prices on large commercial orchards.
